LR6 Trim Accessory

LT6

Product Description

The LT6 trim accessories are designed to snap onto LR6 downlight modules and provide a clean aperture appearance. They are available in a number of color options to allow the light to complement the interior design of a space. They decrease high angle brightness with minimal effect on the total focture output.

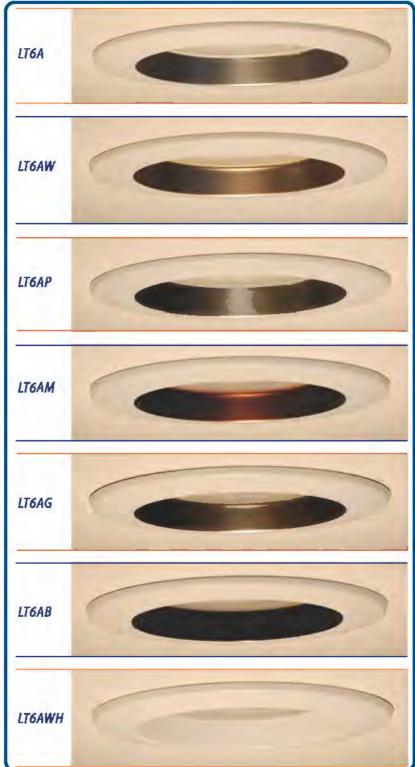

Specifications and Features

- Spun aluminum trim with diffuse anodized finish
- · Room-facing flange is painted white
- Injection molded retaining ring allows for positive attachment to the LT6 family of modules
