

Commercial Christmas Hardware has answered the call for a universal clip for mounting lights on gutters and a variety of shingled-roof types.

- **Single-Solution Design** - we've combined several common applications into a single clip, making it easy to make transitions from gutter mounting to shingle or roof tile mounting. This one clip does it all!
- **Effortless Installation** - light strings attach to the clip through wire guides and a socket seat to securely hold lights. No forcing or twisting.
- **Specialty Applications** - this clip is perfect for aligning C-Sets on gutters in traditional horizontal orientation, and also works great on clay tile roofs in Southwestern style buildings, or for unique installations where you mount the C-bulbs vertically. And, it provides a simple solution for installing hard-to-handle products such as icicle lights, using the innovative utility hook.
- **UV Stabilized Poly** - get season after season of reliable use without degradation from exposure to sunlight.
- **For Most Types of Shingle Roofs** - works on wood, composition, metal and slate tile roofs. Gripper tab folds back to increase friction on worn or loose roofs.

## Typical Installation
