

Thomas Riehle

Total system performance takes center stage.

OSRAM sets the stage and the lighting standard with TP22-XL and TP220-XL eXtra Life sockets, designed to accept all G9.5 base lamps. Engineered to increase lamp life and improve the overall performance of your lamp and socket system, they put on an even better show when teamed up with OSRAM-branded GLA, FLK and other G9.5 base lamps. And with our special construction and thermal management features, these two players promise to stay cool so the show goes on, and stays on!

TP22-XL and TP220-XL Sockets

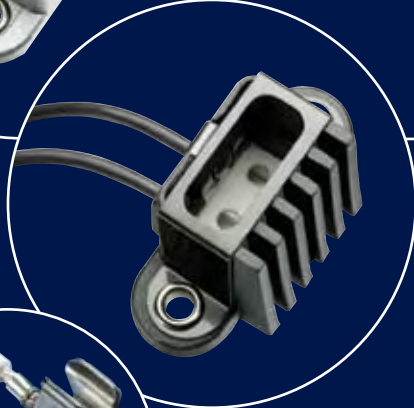

For all G9.5 base lamps.

Get eXtra Life with your OSRAM socket solution.

All Star Casting

The TP22-XL features an aluminum casting for thermal management capability. This improved casting ensures a robust package that secures the lamp in the socket.

The TP220-XL provides the highest level of heat management with its innovative "finned" casting design.

A Top Performer

- Solid nickel contact system provides excellent corrosion resistance.
- Unique and patented contact geometry offers multiple points of contact for superior electrical connection.
- Dual materials optimize electrical and mechanical performance of the lamp and socket connection.

Set the stage for your success.
