

iPonic 600

Finally a serious controller for serious growers

- + iPonic 600 Includes Remote Combination Sensor
 - CO2
 - Temperature
 - Humidity
 - Light

- + 8 Power Outlets integrated directly into controller

Better Control = Better Yields

Control all aspects of your grow room from a single programmable controller - light timers, CO2, temperature, humidity, irrigation pumps - or program your own custom devices.

Simple Automation

- Easy to use touch screen display
- Use factory presets for instant plug and play operation or custom programming in minutes for maximum yield.
- Automatically program growth cycles from early veg through final bloom - customize programs to maximize yields by automating variable CO2, temperature, and humidity levels from beginning to end.

Remote Communications

Complete monitoring and control from outside of the grow room via optional PC software, internet connectivity, or SmartPhone applications to monitor and control your grow room anywhere, anytime!

Peace of Mind with iPonic 600

- Integrated high temperature shut off
- Alarms for high/low temperature, humidity, CO2 via text message or e-mail
- U.L. and C.U.L. approved

AUTHORIZED DISTRIBUTOR:

Features and Benefits

Better Control

8 Power Outlets (6 Programmable)

- CO2 Device Outlet
- Dehumidifier Device Outlet
- Dual Light Timer Outlets
- Independent Cooling Device Outlet
- Independent Heating Device Outlet
- Independent Humidity Device Outlet
- Pump Timer Outlet
- Custom Devices

Integrated Remote Combination Sensor

- 16ft Cord
- High Resolution Light Sensor
- CO2 Sensor
- Humidity
- Temperature

Intelligent Setpoints

- Dawn Temperature Setpoint
- Day / Night Humidity Setpoints
- Day / Night Temperature Setpoints

Built-in Data Logging

- Data Log to Internal Memory (30 days)
- Data Log to Removable USB Drive (3+ years)
- Min / Max Last 24 Hours
- Min / Max Since Reset - CO2, Temperature, Humidity

Special Features

- CO2 Exhaust Fan Shut-Off
- Dual Bank Auto Switch Redundant Control
- Fuzzy Logic CO2 Control
- Graph Data Directly on Controller Display

Communications

- Email / SMS - Text Notifications
- PC Software
- Smart Phone Applications

Ease of Use

- 120 Volt / 15 AMP Input with Resettable Breaker
- Customizable Growth Schedule
- Touch Screen Display
- UL and CUL Approved
- VEG / Bloom pre-programmed Growth Schedule

Peace of Mind

- Alarm Device Output
- Automatic Restart Delay
- High and Low CO2 Alarm
- High and Low Humidity Alarm
- High and Low Temperature Alarm
- High Temp Shut-off
- High Temp Shut-off Alarm
- UL and CUL Approved
