

# ona carbon-air

## Carbon & Ona - the Double Whammy!

The ONA Carbon-Air combines the best of two technologies - air filtering and odor neutralizing for the best odor control money can buy.

High volume, ultimate odor control for large facilities. All problem odors are guaranteed gone.

ONA Carbon-Air outputs 450 cfm to handle the biggest and toughest odor problems. Shown left is replacement carbon filter.

The latest in environmentally friendly odor control - the ONA Carbon-Air combines the best of both worlds - carbon filtering with powerful odor neutralization!

The ONA Carbon-Air draws air in and through a carbon filter. After the air is filtered, it passes over the ONA which guarantees that all odors have been eliminated. The final result is a clean fresh smell throughout the facility.

The ONA Carbon-Air has two 6 inch ports and is easily connected to your existing ventilation system to distribute ONA throughout your room or air exhaust system. The air flow capacity is 450 cubic feet per minute (cfm).

A 30 liter pail of ONA Gel attaches securely to the bottom of the Carbon-Air unit for long-lasting odor protection.

ONA Storm dispenses ONA Gel from an easily replaced, 30 liter container.

Ona permanently eliminates any airborne odors, cleanly and effectively. Ona is environmentally friendly, non-toxic and easy to use. Ona is an industrial strength odor neutralizer, yet can be safely used around people and pets. Everyone who uses it knows...ona works great to make those bad smells disappear. Pets, plants, garbage, smoke, germs, mildew - all are gone with the power of ONA.

*Make Odor Problems Gone.*

Eliminate them permanently with **ona**.
