

Terra Flores Directions of Use

- Dissolve 50 ml / 10 Liter - 19 ml / US gallon (1:200).
- Shake the bottle well before use
- Apply solution 1 to 3 times a week depending on container size, circumstances and using a fertile soil
- If growing in less fertile soil it is recommended to use solution more frequently
- It is recommended to use with soilless mixes that have a nutrient starter charge and longer term pH control like Terra Professional Plus
- Recommended pH: 5.8 - 6.2
- Recommended EC: 1.0 - 1.5 mS/cm (=EC of the nutrient mix)

Other directions

- Keep out of reach of children
- Store in a dark place and prevent from freezing and thawing repeatedly
- Over fertilization has a negative effect on the nutrient mix and plant quality
- Not to be used in protected nature reserves, reed beds or swampy areas, in hedges or small woods, in bodies of surface waters or near groundwater collecting areas
- If the solution comes in contact with the skin or eyes, rinse with water
