

CANNAZYM Directions of Use

Plant extract preparation for breaking down (hemi) cellulose and stimulating micro-life
Cannazym contains regenerative plant extracts and it stimulates the break down of dead root material.

Instructions for use

- Dosage: 25 ml / 10 Liter - 9 ml / US gallon (1:400)
- Minimal once a week, preferable continuously
- When you use older (untreated) slabs, double the dose for a one month period
- When reusing the growing medium, double the dose for one or two weeks
- Do not prepare the solution for more than ten days in advance
- Do not use together with products containing hydroge peroxide

Other directions

- Shake the bottle well before use
- Store in a dark place
- Keep away from extremes of hot and cold
