

## CANNA Start Directions of Use

---

### Directions of use

- Shake bottle well before use
- Fill nutrient reservoir with water
- Add CANNA Start to the nutrient reservoir with the dilution ratio 1:250 (40ml/10Liter or 15 ml/Gal)
- The EC of CANNA Start dissolved in (tap) water varies between 0.7 - 1.3 mS (= the solution EC + the water EC)
- Recommended pH: 5,2 - 6,2
- Make sure there is sufficient drain (10%)

### Other directions

- Keep out of reach of children
- Store in a dark place
- Keep away from extremes of hot and cold
- Over fertilization has a negative effect on the nutrient mix and plant quality
- If the solution comes in contact with the skin or eyes, rinse with water
