

CANNABOOST Directions of Use

CANNABOOST made of naturally fermented plant extracts. It is derived from plants using a special fermentation process

Instructions for use

- Use CANNABOOST in combination with CANNA nutrients
- Shake the bottle well before use
- Do not use with products containing hydrogen peroxide (H₂O₂)
- Apply at the start of blooming phase (usually 1 to 3 weeks after flower initiation)
- CANNABOOST can be given manually, through drip irrigation or foliar spray
- Use up mixed solutions within 7 days
- Dosage: 20ml/10L - 8ml/GAL (1:500); for extra stimulation use: 40ml/10L - 16ml/GAL (1:250)

Other directions

- Keep out of reach of children
- Store closed in a dark and frost-proof place
