Utopia LED series S14 lamps are not only built to operate in the demanding conditions of signs, marquees and amusement rides, but they are also uniquely designed to provide an appearance that replicates traditional incandescent lamps. Utopia lamps do all of this while saving up to 80% in energy costs.

The Utopia LED S14 lamps use special AC LEDs which allow them to operate with fewer electrical components. This reduces the number of potential points of failure, providing you with a more reliable product. This higher level of reliability is especially important in hard to change applications.

**U-LED™ SERIES LED Decorative Candle & Globe**

- Innovative LED Filament Design
- No Visible Circuit Boards or Chips
- Energy Saving
- 40,000 Hours Average Life
- Mercury & Lead Free
- UV & IR Free

**E12 BASE**

Watts	Color Temp.	Description	Order Code
0.6	2700K	U-LED Candle E12, Clear	1003701
0.6	2700K	U-LED Globe E12, Clear	1003702

U-LED is a unique LED candle and globe lamp configuration designed to replicate the appearance of incandescent filament lamps. There are no visible circuit boards or chips. These candelabra base (E12) lamps consume less than 1 watt of energy and have a life rating of 40,000 hours, making them ideal for decorative chandeliers and ornamental fixtures.

USHIO's Utopia LED series candle and globe lamps combine advanced AC LED technology with a unique optic design to provide an elegant and energy efficient option for indoor and outdoor decorative lighting applications. The Utopia candle and globe lamps use special AC LEDs which allow them to operate with fewer electrical components. This reduces the number of potential points of failure, providing you with a more reliable product. This higher level of reliability is especially important in hard to reach chandeliers and other decorative fixtures.
