

HOW CAN A LIGHTBULB CHANGE YOUR LIFE?

Biological LED
Lighting Solutions

It's time to think about
LIGHT IN A NEW WAY.

It can help you
BE ALERT.

Awake & Alert™

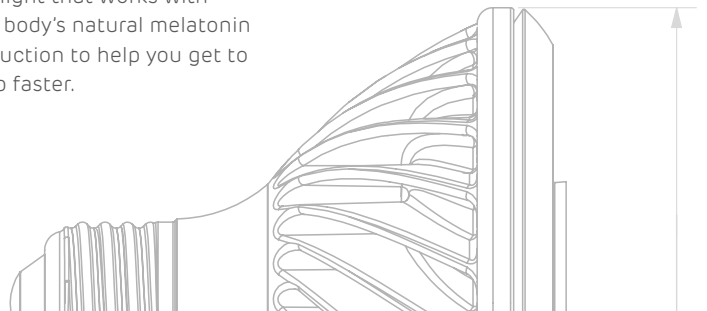

LED light that promotes natural energy, alertness, and focus.

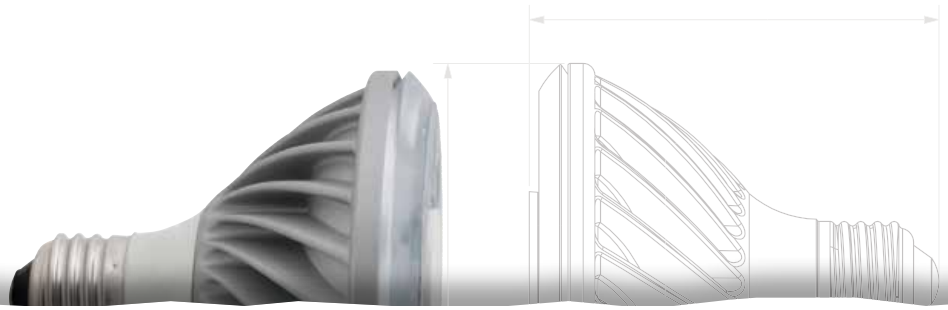

It can
**HELP YOU
SLEEP BETTER.**

Good Night™

LED light that works with your body's natural melatonin production to help you get to sleep faster.

And it can
IMPROVE THE ENVIRONMENT.

MyNature™ Grow and MyNature™ Coastal

LED horticulture and wildlife lighting that works with nature, not against.

This is
WHERE WE COME IN...

Good Night™

For gently soothing to sleep

The proprietary LED source works with your body's natural circadian rhythm. Other lights are more disruptive and don't support natural melatonin production.

Good Night™ helps you **GET A BETTER NIGHTS' SLEEP**

- Supports your body's natural melatonin production.
- Regular light bulbs suppress melatonin - our light emits less "blue" than others.
- Use it to get to sleep faster and to achieve a deeper sleep sooner.

A19 60W Equivalent LED lamp

Shatter-proof +

Stays cool +

Uses less energy +

Fall asleep naturally, calmly and soundly with the Good Night Light from Lighting Science.

- Good Night light is the only patented biologically corrected LED light on the market.
- Good Night uses a patented filter technology to greatly reduce melatonin-suppressing blue light, while delivering commercially acceptable color temperature.
- Used by NASA and the International Space Station to enable astronauts to naturally manage their sleep rather than depending on chemical sleep aids.

MyNature Grow lamps help you
**SAVE TIME, ENERGY
AND MONEY AND EAT
FRESH ALL YEAR LONG.**

- 85% more plant-loving PAR light per watt than other grow lights.
- Features a patented, optimized spectrum to maximize growth.
- Effective for any plant species.

PAR38 90W Equivalent Grow LED lamp

Stays cool +

Uses less energy +

Provide the best light for each phase of growth and plant type, from seedling to flowering to fruiting, with the MyNature Grow Light from Lighting Science.

- Energy Efficient and spectrally optimized lighting solution for a variety of horticultural lighting applications.
- No radiated heat to allow for high irradiance at close proximity to the plant.
- Long life LEDs last an average of 50,000 hours while reducing energy and maintenance costs due to frequently changing, rapidly degrading traditional lamps.

**SEA TURTLES FIND
THEIR WAY TO THE
OCEAN.**

- Spectrum does not disturb wildlife including sea turtles and their hatchlings.
- Meets local ordinances that require protective lighting.
- Replaces traditional lights during hatching season.

PAR30 Short Neck 65W Equivalent LED lamp

Everyone benefits with the advantages offered by the MyNature Coastal Light from Lighting Science.

- Provides sea turtle-friendly amber lighting for increased security when white lighting is regulated by local ordinances.
- Environmentally friendly LED lamps do not contain mercury or lead, making them fully recyclable.
- Energy efficient LED lighting cuts energy lighting usage by >80% over incandescent lighting.
- Safely illuminates your way at night when local ordinances require wildlife-friendly lighting.
