Ceramalux® High Pressure Sodium Lamps
Energy efficiency and long life

- **Comfort High Pressure Sodium**
  For improved color rendering.

- **RetroLux High Pressure Sodium**
  Replace Mercury Vapor with energy efficient HPS; operates on mercury vapor ballast.

- **Instant Restrike High Pressure Sodium**
  Dual arc-tube delivers 40,000 hours rated average life vs. 24,000 hours rated average life for standard HPS lamps. Extra arc-tube provides light instantly after momentary power interruption.

- **ALTO® High Pressure Sodium**
  Passes EPA’s TCLP® test for non-hazardous waste.

- **MasterColor® HPS-Retro White™**
  Optimized to operate on a high pressure sodium ballast. Replace yellow light with crisp, bright white light with just a simple twist!

1) The TCLP is the US EPA’s Toxicity Characteristic Leaching Procedure.

Ideal for roadway lighting, warehouse lighting, security lighting, and industrial applications
Electrical, Technical and Ordering Data

Operates on standard HPS ballasts

- ALTO® Lamp Technology passes EPA’s TCLP test for non-hazardous waste
- High efficacy up to 140 LPW
- Long life—up to 24,000 hours
- Warm white color appearance
- Improved color rendition of 65 CRI
- Low total cost of ownership

Warnings, Cautions and Operating Instructions

- PROPERTY DAMAGE, BURNS AND FIRE. Improperly may result in
- If the outer glass bulb is broken, shut off power immediately and remove the lamp after it has cooled.
- If the outer glass bulb is broken, avoid skin contact with any of them contents or fragments.
- Take care in handling and disposing of lamps. If arc tube is broken, avoid skin contact with any of them contents or fragments.
- The arc tube of this lamp contains sodium and mercury.
- Do not use this lamp in a fixture which redirects a substantial portion of the energy toward the arc tube and its immediate bulb glass.
- B. For total supply load refer to ballast manufacturers local requirements.
- Dispose of in accordance with federal, state and local requirements.

Ceramalux® Comfort High Pressure Sodium Lamps

- Improved color rendition of 65 CRI
- High efficacy
- Warm white color appearance
- Operates on standard HPS ballasts

Ceramalux® High Pressure Sodium Lamps

- Low total cost of ownership
- Long life—up to 24,000 hours
- ALTO® Lamp Technology passes EPA’s TCLP test for non-hazardous waste
Instant Restrike High Pressure Sodium Lamps

- Extra arc tube offers light instantly after momentary power interruption and will provide 80% light output within 1–2 minutes.
- For applications where instant restrike is not required, rated average life is 40,000 hours.
- Operates on standard HPS ballasts and auxiliary equipment.

Ceramalux® RetroLux High Pressure Sodium Lamps

- For operation on all mercury vapor and metal halide ballasts of similar wattage.
- 150W retrofits 175 watt mercury vapor or metal halide.
- 220W retrofits 250 watt mercury vapor or metal halide.
- 360W retrofits 400 watt mercury vapor or metal halide.

**WARNINGS, CAUTIONS AND OPERATING INSTRUCTIONS for Ceramalux® RetroLux High Pressure Sodium Lamps**

**Warnings, Cautions and Operating Instructions**

**CAUTION:** Electric discharge lamp—Use only with proper circuits and auxiliary equipment designed to produce established electrical values for this lamp. Operating the lamp improperly may result in damage to equipment or personal injury for which the lamp manufacturer does not assume any responsibility.

- Do not use this lamp in a fixture which redirects a substantial portion of the energy toward the arc tube and its immediate vicinity, as this may lead to very early lamp failure.
- Do not use this lamp in a fixture which redirects a substantial portion of the energy toward the arc tube; otherwise very early failure is anticipated.
- Operates at rated output on ANSI 400W S145 ballasts.
- UV filtered design (FadeBlock™).
- Heat resisting glass bulb.
- PAR-38 (one piece)
- Nickel plated brass base.
- This product utilizes ALTO® Lamp Technology; ALTO products pass the US EPA’s Toxicity Characteristic Leaching Procedure (TCLP) for non-hazardous waste status.
- The arc tube of this lamp contains sodium and mercury. Use appropriate care in disposal. Protect lamp base, socket and wiring against moisture, corrosive atmospheres and excessive heat.

**FOOTNOTES for Ceramalux® High Pressure Sodium Lamps**

1) Rated average life is the life obtained, on the average, from large representative groups of lamps in laboratory tests under controlled conditions at 10 or more operating hours per start. It is based on survival of at least 50% of the lamps and allows for individual lamps or groups of lamps to vary considerably from the average. For lamps with a rated average life of 24,000 hours, life is based on survival of 67% of the lamps.

2) Approximate lumen values listed are for vertical operation of the lamp.

3) Approximate lumen output at 40% of lamp rated average life.

4) Follow fixture manufacturer’s recommendations regarding proximity of ballast to bulb.

5) Electrically insulated support for bulb may be required, especially in horizontal and nearly horizontal operating positions.

6) Fixtures should be designed so that sockets and wiring withstand starting pulse up to 5000 volts for 1000 watts and with double segment (DS) types and 4000 volts for other sizes.

7) C150SS and C150SS6 lamps are not electrically interchangeable. Different ballasts are required for the proper operation of each lamp type. ANSI type SS ballast is for the 55-volt (normal) lamp and the ANSI type SS6 ballast is for the 500-volt (nominal) lamp.

8) This lamp should be shielded from moisture to prevent breakage.

9) For use in fixtures which do not redirect a substantial portion of the energy toward the arc tube; otherwise very early failure is anticipated.
MasterColor® Ceramic Metal Halide HPS-Retro White™

- MasterColor technology optimized to operate in existing HPS fixtures, which means a simple, twist-of-the-wrist conversion
- Improved work environment (crisp white light vs. yellow light)
- Better for the environment: TCLP®-compliant
- Replace yellow light with white light with just a simple twist!
- For operation on HPS ballasts; 85% lumen maintenance
- No shut off required in 24-hour-a-day/7-day-a-week operations (relamp fixtures at or before the end of rated life)

WARNINGS, CAUTIONS AND OPERATING INSTRUCTIONS for Protected MasterColor® Ceramic Metal Halide HPS-Retro White® Lamps ED-18 (Vertical Burn ± 15º, Open or Enclosed Fixtures)

Warnings, Cautions and Operating Instructions

**WARNING:** These lamps can cause serious skin burn and eye inflammation from short wave ultraviolet radiation if outer envelope of the lamp is broken or punctured. Do not use where people will remain for more than a few minutes unless adequate shielding or other safety precautions are used. Certain lamps that will automatically extinguish when the outer envelope is broken or punctured are commercially available. This lamp complies with FDA radiation performance standard 21 CFR subchapter J.

MasterColor® Ceramic Metal Halide HPS-Retro White® Lamps ED-18 (Vertical Burn ± 15º, Open or Enclosed Fixtures)

These lamps are designed to retain all the glass particles should an arc tube rupture occur. The following operating instructions are recommended to minimize these occurrences.

**RELAMP FIXTURES AT OR BEFORE THE END OF RATED LIFE.** Allowing lamps to operate until they fail is not advised and may increase the possibility of inner arc tube rupture.

This lamp contains an arc tube with a filling gas containing Kr-85 and is distributed by Philips Lighting Company, a division of Philips Electronics North America Corporation, Somerset, New Jersey, 08875.

**CAUTION:** REDUCE THE RISK OF PERSONAL INJURY, PROPERTY DAMAGE, BURNS AND FIRE RESULTING FROM AN ARC-TUBE RUPTURE. THE FOLLOWING LAMP OPERATING INSTRUCTIONS MUST BE FOLLOWED:

**LAMP OPERATING INSTRUCTIONS:**

1. RELAMP FIXTURES AT OR BEFORE THE END OF RATED LIFE. Allowing lamps to operate until they fail is not advised and may increase the possibility of inner arc tube rupture.
2. Before lamp installation/replacement, shut power off and allow lamp and fixture to cool to avoid electrical shock and potential burn hazards.
3. Use only auxiliary equipment meeting Philips and/or ANSI standards. Use within voltage limits recommended by ballast manufacturer.
4. Operate lamp only within specified limits of operation.
5. For total supply load refer to ballast manufacturers electrical data.
6. Periodically inspect the outer envelope. Replace any lamps that show scratches, cracks or damage.
7. If a lamp bulb support is used, be sure to insulate the support electrically to avoid possible decomposition of the bulb glass.
8. Protect lamp base, socket and wiring against moisture, corrosive atmospheres and excessive heat.
9. Lamp color is also subject to change under conditions of excess vibration or shock and color appearance may vary between individual lamps.
10. Lamps may require 10 to 20 minutes to re-light if there is a power interruption.
11. Take care in handling and disposing of lamps. If an arc tube is broken, avoid skin contact with any of the contents or fragments.

FOOTNOTES for MasterColor® Ceramic Metal Halide HPS-Retro White® Lamps

1) Rated average life is the life obtained, on the average, from large representative groups of lamps in laboratory tests under controlled conditions at 10 or more operating hours per start. It is based on survival of at least 50% of the lamps and allows for individual lamps or groups of lamps to vary considerably from the average.
2) Approximate lumen values listed are for vertical operation of the lamp.
3) Approximate lumen output at 40% of lamp rated average life.
4) Performance may not be satisfactory unless operated within specified operating positions.
5) Heat resisting glass bulb.
