

FEATURES AND SPECIFICATIONS

INTENDED USE

Factory or field installed inside or outside (field only) fluorescent fixture to operate lamp(s) at reduced light output, providing optimum glare-free illumination for a minimum of 90 minutes upon interruption of normal power.

CONSTRUCTION

- Durable thermoplastic/metal housing resists impact, scratches, and corrosion. UL-94V-0 flame rating
- Reduced-profile footprint fits in the tightest applications
- Polarized quick-connect pilot light/test switch assembly simplifies installation
- Pilot light and test switch provide visual and manual means of monitoring system operation
- U.S. Patent No. 6,522,147.

PERFORMANCE

Operates one 2'- 4' or U-shaped fluorescent lamp for 90 minutes. (Compatible with most electronic T8 and magnetic T12, instant start, rapid start and slimline ballasts).

ELECTRONIC

- Multi-voltage input capability (120-277V; 50/60 Hz).
- Additional input lead provided to allow switching of fixture.
- Constant-current type charger.
- Input circuit provides high efficiency and reliable operation.
- High-efficiency push-pull inverter is the most effective method of converting DC power. It provides maximum light output, battery life and reliability.

BATTERY

Sealed, maintenance-free, high-temperature nickel cadmium battery. Ensures long life over a wide range of temperatures. Automatic battery recharge after 90-minute discharge. Fully charged after 24 hours.

INSTALLATION

- Patented Quick-Disconnect connector system allows for easy replacement capabilities.
- Push-nuts and insulation-displacement connectors reduce installation time. Custom, one-piece test switch/pilot light allows for mounting flexibility.
- Mounts concealed within fixture wireway for clean appearance and protection against vandalism.
- Compact size (9.5" L x 2.5" W x 1.18" H) allows installation in a variety of fluorescent fixtures: troffers, industrials, commercials and strips.
- Unit mounting centers are identical to a standard ballast.
- Unit wires two ways: on night light circuit (permanently energized) or on switchable circuit (unswitched circuit to the battery charger and switched circuit to the fixture ballast). Unit will strike normally off lamp.

Fluorescent Battery Packs

PSQ500QD MVOLT

H - 1-1/2"
W - 2-1/2"
L - 9-1/2"

LISTING

- UL listed. Meets UL 924, NFPA 101 (current Life Safety Code), NEC and OSHA illumination standards.
- Standard unit is UL approved for installation in sealed and gasketed fixtures.
- For product UL approved for use in wet and damp location fixtures, see PSQ500DW specification sheet.

WARRANTY

Three-year total customer satisfaction warranty. (For complete details, see warranty page in Product Selection Guide).

Lead times will vary depending on options selected. Consult with your sales representative.
