INSTALLATION INSTRUCTIONS

IMPORTANT
READ CAREFULLY BEFORE INSTALLING FIXTURE.

RAB Wallpacks must be wired in accordance with the National Electrical Code and applicable local codes. Proper grounding is required for safety.

Wallpacks are for outdoor use and should not be used in areas with limited ventilation or high-ambient temperatures. Installation should be done by a qualified electrician.

WARNING: Make certain power is OFF before installing or maintaining fixture.

LOCATION
Fixture should be located on wall at least 18” below any overhang or other structural detail.

Fixture should not be recessed. Fixture must be positioned with lamp in horizontal position.

MOUNTING
Use the drill and knock-out template on the inside back surface of the wallpack to match most standard recessed junction boxes (see “A”) or for more secure installation, lag backplate to mounting surface using points “B”.

1. Remove the lens and reflector.
2. Prepare the backplate for use by drilling or knocking out the appropriate holes.
3. Line up the backplate in desired location and mount securely.
4. Complete the wiring to the power source and ground (see wiring instructions).
5. Replace the reflector, install the lamp and mount the lens.
6. To insure weatherproof seal make sure all holes (mounting, plugs, conduit, etc.) are sealed with weatherproof silicone sealant.

(over)
WIRING

Units built for a specific voltage are factory-wired. Make sure the supply voltage is compatible with the unit. Multi tap units may be used with a choice of 120v, 208v, 240v and 277v, provided that proper transformer leads are connected in the field.

1. Connect the appropriate voltage black fixture lead to the black supply lead.
2. Connect the white fixture lead to white supply lead.
3. Fixture ground screw must be connected to supply ground.
4. All unused leads must be capped and insulated.

PHOTOEYE INSTALLATION

A photoeye control may installed in the field.
1. Remove lens and reflector
2. Remove close up plug on top of fixture.
3. Install Photoeye as per diagram.

RE-LAMPING

Caution: Prior to installing, check that the lamp is of proper type and wattage. Observe lamp manufacturer’s recommendations on lamp operation, ballast type and burning positions.

1. Disconnect power.
2. Make sure fixture and lamp are cool enough to touch.
3. Loosen two screws holding lens frame.
4. Open lens by swinging door to the left, letting hinge hold lens.
5. Replace lamp.
6. Close lens and re-install screws.

ATTACHING WIRE GUARD

Wire guard is attached over the glass refractor by means of the self-tapping screws (not supplied).

Note: Fixture must be ordered with wire guard since it must be specially drilled.

CLEANING

Caution: Be sure fixture temperature is cool enough to touch. Be sure power is off.

Clean Reflector and lens with a cloth moistened with non abrasive glass cleaning solution.

TROUBLESHOOTING CHECKLIST

Check that:
1. Proper lamp is installed. Lamp is not faulty.
2. Line voltage at the fixture is proper.
3. Fixture is wired properly.
4. Fixture is grounded properly.
