Initial treatment: Apply 1/2 gram/plant site directly to roots. Follow up treatment: Mix 1/2 gram/plant with a small amount of water and apply to soil around plant. Refer to product label for application instructions.

\*when growing plants in coco media, use 20% more grow formula or 5 ml/gal of Cal-Mag Plus for the first 2 weeks.

For best results, foliar feed plants weekly with 10-15 ml/gallon of Liquid Karma or Triflex Grow formula (clone/seedling strength). In bloom phase use Triflex Bloom (clone/seedling strength) instead of Grow.

\*Note: For optimal results use in conjunction with Reverse Osmosis water.

\*\*Note: Reducing fertilizer application rates by 10 - 25% when using (multiple) supplements can help regulate ppm levels.
