

Diamond Black® contains pure mined leonardite, a naturally occurring form of carbon drawn from prehistoric peat bogs. Diamond Black is a soil amendment that contains humic acids and can aid in micronutrient uptake. Diamond Black can be added to all types of garden soils and potting mixes, and used with a wide variety of plants during all phases of growth. Works with all plant foods.

General Organics provides gardeners with a complete line of superior organic based plant foods and supplements. We combine traditional gardening techniques with the ecological and efficient materials of the future. Each product in the "GO" line enables you to enrich your garden, your life, and the planet. General Organics foundation rests upon our deep commitment to provide simple and innovative products with unsurpassed quality.

Usage:

Potted Plants:

Mix 1 tablespoon of Diamond Black per gallon of irrigation water.

Lawn, garden, and yard plants:

Mix ½ cup of Diamond Black in 5 gallons of water and water freely; apply throughout growing season (4-8 times per year) or apply 4 ounces (1/2 cup) per 1,000 square feet 4-8 times throughout the growing season with a hose end sprayer or other liquid applicator.
