

Premium Quality T8/T5 Fluorescent High Bay

General Information

The New High-bay is equipped with a 95% reflection vega-95 aluminum reflector which creates a high efficiency light source. By using a universal voltage electrical ballast, makes this ideal for commercial and industrial use. The premium design of this fixture makes the housing stronger and allows for better performance. Using fluorescent lamps cuts down the electricity consumption up to 70% compare to HID and gives a better light output and higher quality of light source.
