

CR4™ SERIES HOUSING COMPATIBILITY

The CR4 Series of LED downlights is designed to upgrade existing 4" recessed housings to energy-saving, long-lasting LED lighting.

Compatible housings are at least 3.5" tall, when measured from the ceiling to the bottom of the socket base AND between 3.9" and 4.1" in maximum inner diameter. Measure your existing housings to ensure compatibility.

Examples of housings that are known to be compatible are*:

Halo	H99 Series
Juno	IC1 Series and TC1 Series
Commercial Electric	HBR2000R
Progress	P831-AT, P831-FB, P830-TG, P832-TG
Con-Tech	RL20 Series
All-Pro	E1400AT, ET400RATSB

*Note: Compatible housings should have either an E26 "Edison" base or GU24 base socket, powered by 120V AC and installed according to the National Electric Code and local installation requirements. Always measure existing housings to ensure compatibility.
