### Replacing the LED board

#### 1) Turn off power to luminaires.

### 2) Remove 4 screws from LED board.

### 3) Board will hang, held by 2 wires.

# 4) Loosen 2 top screws and remove top cover.

## 5) Cut blue and red LED board wires and remove bad LED board.

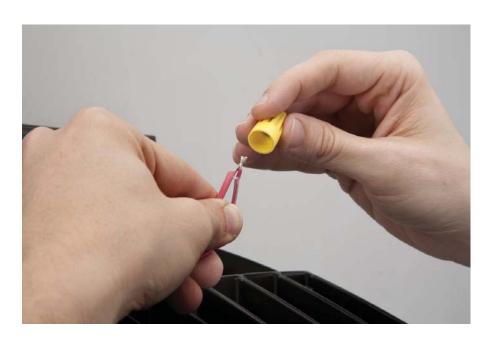

6) Route the new wires through the wire way hole in the housing.

### 7) Screw in 4 LED board screws.

## 8) Strip wires and use wire nuts to connect red to red and blue to blue.

9) Reinstall lid, making sure no wires are pinched. Screw down 2 screws.
