\*Max (Lamps per Dimmer) - Additional lamps may work with your dimmer system. For maximum capacity please consult dimmer manufacturer.

†May experience "pop-on", lights cannot be turned on immediately to their minimum level. The slider needs to be raised above the minimum light level for the lights to first turn on if they were initially off. Then, the slider can be lowered to get to a lower light level; the dimmer cannot be turned on to just the minimum level.

**Overall Rating**

**Not Compatible** - Major flickering observed, audible noise, no dimming range

**Limited** - Minimal adjustment may be required, audible noise may be present, minor flickering observed but does not affect dimming range and can be removed with slight dim adjustment

**Best** - No flickering, minor or no audible noise, wide dimming range (20% or less light output)
