Please see page #2 for additional usage information

ADDITIONAL USAGE NOTES

CHARGED CO₂ READY TO USE PRODUCTS

Available in 16 Ounce and 2 Liter Bottles

INCREASE GROW!™ & INCREASE BLOOM!™ CHARGED CO₂ FOLIAR SPRAYS

- DO NOT USE INCREASE WITH ANY OTHER PRODUCTS. ALL INCREASE PRODUCTS WERE FORMULATED TO BE UTILIZED AS ALL-IN-ONE, PERFECTLY BALANCED FORMULATIONS.
- Open your bottle of INCREASE GROW!™ or INCREASE BLOOM!™ and immediately pour contents into spray applicator. (Pressure sprayer or atomizer recommended)
- Once opened, use entire contents immediately as a foliar application only.
- Immediately reseal original container if any contents are left over.
- Spray/Mist directly to tops of leaf surfaces to run off 10-20 minutes before daylight or lights come on.
- During Growth Cycle, spray/mist leaves with INCREASE GROW!™ to run-off 2-4 times per week.
- During Bloom Cycle spray/mist leaves with INCREASE BLOOM!™ until week four (4) or flower induction.
- Once flowers are visible, use INCREASE BLOOM!™ highly concentrated powdered formulation AS A SOIL DRENCH ONLY until harvest.
- Do Not add wetting agents or dish soaps.
- Do Not use any INCREASE GROW!™ or INCREASE BLOOM!™ products in a reservoir.
- INCREASE GROW!™ & INCREASE BLOOM!™ charged CO₂ formulations are for foliar applications only.

HIGHLY CONCENTRATED POWDER PRODUCTS

Available in 4 Ounce, 1 Pound and 5 Pound Containers

INCREASE GROW!™ & INCREASE BLOOM!™ HIGHLY CONCENTRATED POWDERS

- DO NOT USE INCREASE WITH ANY OTHER PRODUCTS. ALL INCREASE PRODUCTS WERE FORMULATED TO BE UTILIZED AS ALL-IN-ONE, PERFECTLY BALANCED FORMULATIONS.
- To maximize results, use INCREASE GROW!™ or INCREASE BLOOM!™ highly concentrated powder formulations in conjunction with the Charged CO₂ Foliar Applications (above).
- Mix one (1) teaspoon (5 ML) per gallon of water (RO Water Recommended).
- Allow mixed formulations to stand/steep for 24/48 hours prior to use. Strain and hand feed/water plants.
- Spray/Mist directly to tops of leaf surfaces to run off 10-20 minutes before daylight or lights come on.
- During Growth Cycle, use INCREASE GROW!™ highly concentrated powder formulation as a foliar spray or soil drench 1-3 times per week with normal feeding/watering.
- During Bloom Cycle, use INCREASE BLOOM!™ highly concentrated powder formulation as a foliar spray or soil drench 1-3 times per week with normal feeding/watering.
- Once flowers are visible, use INCREASE BLOOM!™ highly concentrated powdered formulation AS A SOIL DRENCH ONLY with normal feeding/watering regimen until harvest.
- During the last week of the Bloom Cycle, stop using all products and feed plants water only. RO Water Recommended.
- DO NOT FOLIAR FEED LEAVES ONCE FLOWERS ARE VISIBLE
