

## Product Description

The Gama Sonic Solar Porch Light **GS-5** is one of our newest products in the solar accent light category that incorporates our new solar LED technology. This solar accent light features a warm white light creating the naturally look and feel of an electric accent light with incandescent light bulb. Its small dimensions make it the perfect lighting solution that can be easily mount on narrow outdoor spaces making this porch light the perfect solar lighting solution for those who are seeking to easily install a light fixture without any additional costs.

**New Patent Pending LED Solar Bulb Technology:** Our Solar Porch Light is powered by a single patent pending LED solar bulb. This bulb automatically turns on at dusk and at 40 lumens will illuminate for up to 10 hours.

**Automatic Operation at Dusk:** This solar lamp is designed to provide automatic performance at dusk

**No Electrical Wiring:** The Solar Porch Light requires no electrical wiring for installation, making it the perfect replacement for outdated electric or gas-powered outdoor lighting.

**Easy installation:** This Porch Light is very easy to install with its revolutionary mounting bracket that can be installed with only one screw.

**Solar Powered:** Just mount our Solar Porch Light at your desired location, and let the sun do the rest. The solar lights internal Lithium Ion battery packs charge when sunlight hits the integrated solar panel. At dusk, our revolutionary outdoor Solar Light Bulb will turn on automatically and shine a warm white light at a brightness of 40 lumens.

**Durable and Weather Resistant:** Beyond providing a superior combination of light brightness and duration, Gama Sonic solar light fixtures are known for their physical durability. The monocrystalline solar panel is protected by weather-resistant, cleanable tempered glass that helps ensure long-lasting reliability.

**High / Low mode switch:** Extends nightly light duration up to 10 hours of operation on a full charge.

**Built to Last:** At Gama Sonic, our goal is to build the world's best solar lights by providing long lasting light fixtures that are simply built to last! Every light fixture has an integrated Lithium Ion battery pack that is good for about 1,000 charges. Once the battery exceeds its life – all you will need to do is simply replace the battery and you are good to go for the next 3 years.

**Do not locate the light fixture in a shaded area:** Recharging speed will vary based on weather conditions, but no charging will occur if direct sun does not shine on the solar panel.

**WARNING:** GAMA SONIC® Light bulbs are not to be used in other electrical sockets. These are low-voltage light bulbs that are built and designed for our products only!

## Full Technical Specs

<b>Model #</b>	GS-5
<b>LED Color</b>	2700K
<b>Technology</b>	Solar LED Light Bulb

<b>Lumens</b>	40
<b># of LEDs</b>	11
<b>Battery</b>	Li-ion
<b>Voltage</b>	3.2
<b>Battery Capacity</b>	600 mAh
<b>Power Source</b>	Mono-Crystalline Solar Cell
<b>Light Duration</b>	Up to 8 hours
<b>Measurements</b>	7 x 4.5 x 5.75
<b>Weight</b>	1 lbs
<b>Dimensions</b>	12 x 8 x 8 in
