

Gama Sonic

Solar Address Sign GS-80

Product Description

The Gama Sonic GS-80 solar LED illuminated address sign makes home addresses visible day or night with bright green light. The GS-80 can accommodate addresses up to five characters in length; it comes standard with three of each number 0-9 plus the letters N, S, E, W.

Contact Gama Sonic directly if the kit doesn't have the right combination of numbers to support your address.

All In One Solar Lighting Solution: This Solar Address Light comes with all the hardware needed for mounting this unit anywhere you choose where ample sunshine is available

Cost Effective: Solar Powered Address Light means no further costs, making this unit a cost effective solar lighting solution for new installation or a perfect money-saving replacement for electrical outdoor address lighting.

Dusk-to-Dawn Operation: This Gama Sonic solar address light is designed to provide dusk-to-dawn performance for up to 15 hours with its 5 Super Bright LEDs when its battery gets fully charged during the day.

No Electrical Wiring Is Needed. Just install the solar address light and let the sun do the rest. The GS-80's internal AA NiMH battery pack charges when sunlight hits the fixture's integrated solar panel.

Solar Powered: The five LEDs are designed to illuminate automatically from dusk to dawn if the batteries have received a full solar charge. When the batteries are run down, it takes a day's worth of sunlight on the solar panel to achieve a full recharge. With proper setup for optimal sun exposure, a sunny day without cloud cover should be sufficient to provide a full recharge. Recharging speed will vary based on weather conditions, but no charging will occur if direct sun does not shine on the solar panel. Do not locate the solar light fixture in a shaded area.

Full Technical Specs

Model #	GS-80
LED Color	3100K
Lumens	25
# of LEDs	5
Battery	600 mAh NiMh

Light Duration Up to 12 hours
Measurements 14.75 x 2.5 x 5.75 in
