

Gama Sonic

Premier Solar Garden Light GS-139 Set of 2

Product Description

This 2-PK of Gama Sonic's GS-139 Premier Solar Garden Lights are the perfect set of accent lights for illuminating paths or gardens. Installation is as simple as staking our solar lights where you want them, and that's it! There is no electrical wiring needed.

After assembled on the cast-aluminum stakes, the units will stand 17" tall once fully inserted into the ground, ensuring good visibility of the lights on your pathway or in your garden.

The solar panels on top of the light heads harness the sun to charge the internal Lithium Ion battery packs.

At dusk each Premier Solar Garden light's warm-white LEDs will turn on at a brightness of 50 lumens and are designed to stay lit for eight hours when the battery has been fully charged in direct sun during the day.

Our Premier Solar Garden lights are built to last from rust-resistant, powder-coated cast-aluminum and ribbed glass. Their monocrystalline solar panels are protected by weather-resistant, cleanable tempered glass that help ensure long-lasting reliability.

The rechargeable/replaceable battery packs are good for about 1,000 charges. With proper setup for optimal sun exposure, a sunny day without cloud cover should be sufficient to provide a full recharge.

Recharging speed will vary based on weather conditions, but no charging will occur if direct sun does not shine on the solar panel, so do not put the Premier Solar Garden lights in the shade.

At Gama Sonic, our goal is to build the world's best solar lights. For any product questions or unexpected issues with your Gama Sonic product, Gama Sonic support at our Atlanta headquarters is here to help.

Full Technical Specs

Model #	GS-139
LED Color	3100K
Lumens	50
# of LEDs	1
Battery	Li-ion
Voltage	3.2V
Battery Capacity	800 mAh
Power Source	Mono-Crystalline Solar Cell
Solar Panel	.8W
Light Duration	Up to 10 hours
Measurements	6 x 6 x 17 in
