

Gama Sonic

Solar Security Light w/ Motion Sensor GS-10

Product Description

Solar Security Light with Motion Sensor

The Gama Sonic GS-10 Outdoor Solar Security Light with motion sensor is the perfect energy-saving and money-saving replacement for electric security lights.

All In One Solar Security Solution: This Solar Security Light comes with all the hardware for mounting this unit anywhere you choose where ample sunshine is available, and it can easily be installed with the provided brackets and two screws to most surfaces.

Proper Coverage: The integral motion sensor for the Gama Sonic GS-10 solar security light provides a 160-degree detection zone up to 50 ft for proper coverage.

Personalize Intelligent Mode Settings: Our Solar Security light can come with personalized settings in mind, giving you the option to control light duration once motion is detected, sensing distance and darkness level.

Brighter LED Lights: (10) Super Bright SMD LED's.

Automatic: The light features a PIR (motion sensor) that is activated when movement is detected from 2 ft up to 50 ft. If no further movement is detected during the 8 seconds that the light is on, the light will automatically turn off.

No Electrical Wiring Is Needed. Just install the light fixture and let the sun do the rest. The Solar Security Light's internal Lithium Ion battery pack charges when sunlight hits the fixture's solar panel.

Powerful Motion Sensor: When motion is detected 10 bright-white SMD LEDs will turn on automatically and shine at 400 lumens from 8 seconds up to 5 minutes when the motion sensor detects movement up to 50 ft away.

Durable and Weather Resistant: Beyond providing a superior combination of light brightness and duration, Gama Sonic solar light fixtures are known for their physical durability. The monocrystalline solar panel is protected by weather-resistant, cleanable tempered glass that helps ensure long-lasting reliability.

The light's rechargeable battery pack is good for about 1,000 charges or roughly 3 years. When replacing the battery, simply unclip the battery and connector and connect the new battery pack. Then place the battery back into the battery compartment.

Solar Powered Light: If you wish to mount the solar security light fixture in a shaded area, please note that the solar panel can be installed up to 15ft away from the actual solar security light and has to be exposed to direct sunlight.

We highly recommend reading the instruction manual carefully to obtain the best results from your purchase.

Full Technical Specs – Solar Security Light

Model #	GS-10
LED Color	6000K
Technology	Solar
Lumens	400
# of LEDs	10
Battery	Li-ion
Voltage	3.7
Battery Capacity	2000 mAh
Power Source	Mono-Crystalline Solar Cell
Light Duration	Up to 3 Hours
Measurements	8.5 x 6 x 12
Cord Length	15 ft
