

Product Description

The Gama Sonic Royal Bulb **GS-98B-F** single lamp head has now been upgraded with our latest innovative technology: Our Solar SMD LED Light Bulbs. This Solar Lamp will illuminate your yard and pathways and is the perfect energy-saving and money-saving replacement for electric or gas-powered outdoor lighting.

Classic Design Meets Modern Energy Efficiency: This rust-resistant powder-coated cast-aluminum solar light which features the attractive design of the New Orleans-streetlamp is manufactured with a Weathered Bronze finish and beveled glass panes, and has now been integrated with our latest revolutionary technology: our Solar LED Light Bulb. Standing 18 inches tall, this powerful Solar Lamp will add style and distinction wherever it's installed.

New Patent Pending LED Solar Bulb Technology: This lamp head is powered by a single patent pending LED solar bulb. Small but powerful, this bulb automatically turns on at dusk and in high brightness mode shines at 120 lumens. The **GS-98B-F** not only gives your yard ample lighting, but also gives the solar lantern a traditional look since it resembles standard electrical light.

No Electrical Wiring: It requires no electrical wiring for installation, making it the perfect replacement for outdated electric or gas-powered outdoor lighting.

3 Inch Fitter – Our Royal solar lamp comes with 3" fitter attached to the bottom and will fit on any existing 3" outside diameter pole.

Solar Powered: Just set our Royal Solar Lamp at your desired location, and let the sun do the rest. The solar lights internal Lithium Ion battery packs charge when sunlight hits the integrated solar panels. At dusk, our revolutionary outdoor Solar Light Bulb will turn on automatically and shine a warm white light through the beveled glass panes at a brightness of 120 lumens on a full solar charge.

Dusk to Dawn Automatic Operation: This Solar Light fixture is designed to provide automatic dusk to dawn performance at dusk after its battery has been fully charged during the day. If the panels aren't getting enough direct sun to charge the battery to capacity, switch LED-brightness mode to economy mode to extend nightly light duration.

Durable and Weather Resistant: Beyond providing a superior combination of light brightness and duration, Gama Sonic solar light fixtures are known for their physical durability. The mono-crystalline solar panel is protected by weather-resistant, cleanable tempered glass that helps ensure long-lasting reliability.

Built to Last: At Gama Sonic, our goal is to build the world's best solar lights by providing long lasting light fixtures that are simply built to last! Every light fixture has an integrated Lithium Ion battery pack that is good for about 1,000 charges. Once the battery exceeds its life – all you will need to do is simply replace the battery and you are good to go for the next 3 years.

Do not locate the light fixture in a shaded area: Recharging speed will vary based on weather conditions, but no charging will occur if direct sun does not shine on the solar panel.

WARNING: GAMA SONIC® Light bulbs are not to be used in other electrical sockets. These are low-voltage light bulbs that are built and designed for our products only!

Full Technical Specs

Model # GS-98B-F-WB

LED Color	2700K
Technology	Solar LED Light Bulb
Lumens	120
# of LEDs	11
Battery	Li-ion
Voltage	3.2
Battery Capacity	1500 mAh
Power Source	Mono-Crystalline Solar Cell
Light Duration	Up to 8 hours
Measurements	9x9x18
Weight	8 lbs
Dimensions	11 x 11 x 21 in
Color	Weathered Bronze
