

Product Description

Classic Design Meets Modern Energy Efficiency: This rust-resistant cast-aluminum solar lantern, which features the attractive design of a 19th-century lamp is manufactured with a powder-coated black finish and beveled glass panes, and has now been integrated with our latest revolutionary technology: our Solar LED Light Bulb. Standing 90 inches tall, this powerful Solar Lamp Post will add style and distinction wherever it's installed.

New Patent Pending LED Solar Bulb Technology: Each lamp head is powered by a single patent pending LED solar bulb. Small but powerful, these bulbs automatically turn on at dusk and in high brightness mode shines at 150 lumens each, that's 450 lumens total. The **GS-94B-T** not only gives your yard ample lighting, but also gives the lantern a traditional look since they resemble standard electrical light bulbs.

No Electrical Wiring: It requires no electrical wiring for installation, making it the perfect replacement for outdated electric or gas-powered outdoor lighting.

Solar Powered: Just set our Victorian Solar Lamp at your desired location, and let the sun do the rest. The solar lights internal Lithium Ion battery packs charge when sunlight hits the integrated solar panels. At dusk, our revolutionary outdoor Solar Light Bulbs with 11 bright-white LEDs in each head will turn on automatically and shine through the beveled glass panes at a brightness of 450 lumens on a full solar charge.

Dusk to Dawn: This Solar Light fixture is designed for dusk to-dawn-operation after its batteries have been fully charged during the day. If the panels aren't getting enough direct sun to charge the batteries to capacity, switch LED-brightness mode to economy mode to extend nightly light duration.

Durable and Weather Resistant: Beyond providing a superior combination of light brightness and duration, Gama Sonic solar light fixtures are known for their physical durability. The monocrystalline solar panel is protected by weather-resistant, cleanable tempered glass that helps ensure long-lasting reliability.

Built to Last: At Gama Sonic, our goal is to build the world's best solar lights by providing long lasting light fixtures that are simply built to last! Every light fixture has an integrated Lithium Ion battery pack that is good for about 1,000 charges. Once the battery exceeds its life – all you will need to do is simply replace the battery and you are good to go for the next 3 years.

Do not locate the light fixture in a shaded area: Recharging speed will vary based on weather conditions, but no charging will occur if direct sun does not shine on the solar panel.

WARNING: GAMA SONIC® Light bulbs are not to be used in other electrical sockets. These are low-voltage light bulbs that are built and designed for our products only!

It is highly recommended to secure the base into a solid surface such as concrete or wooden patio (bolts included). We highly recommend reading the instruction manual carefully to obtain the best results from your purchase.

Full Technical Specs

Model #	GS-94B-T
LED Color	2700K
Technology	Solar LED Light Bulb
Lumens	450 (150×3)
# of LEDs	33 (11×3)

Battery	Li-ion
Voltage	3.2
Battery Capacity	3000 mAh
Power Source	Mono-Crystalline Solar Cell
Light Duration	Up to 12 hours
Measurements	25x25x87
Weight	27 lbs
Shipping Dimensions	28 x 27 x 11 in
