

Product Description

The Victorian Bulb **GS-94B-FPW** Solar Lamp is an excellent alternative to traditional gas and electric lamps. It gives the same look and feel of traditional lamps with a lower operating cost. This solar lamp is quite versatile and can go anywhere around your home. If direct sunlight is available, this lamp can be installed.

- **Classic Design Meets Modern Energy Efficiency:** This rust-resistant cast-aluminum solar lantern, which features the attractive design of a 19th-century lamp is manufactured with a powder-coated black / white finish and beveled glass panes, and has now been integrated with our latest revolutionary technology: our Solar LED Light Bulb. This 15 inches tall powerful Solar Lamp will add style and distinction wherever it's installed.
- **New Patent Pending LED Solar Bulb Technology:** It's powered by a single patent pending LED solar bulb. Small but powerful, this bulb automatically turns on at dusk and in high brightness mode shines at 150 lumens. The bulb not only gives your yard ample lighting, but also gives the lantern a traditional look since it resembles a standard electrical light bulb.
- **No Electrical Wiring:** It requires no electrical wiring for installation, making it the perfect replacement for outdated electric or gas-powered outdoor lighting.
- **Solar Powered:** By being solar powered, it is harvesting free energy from the sun eliminating the need for using electricity or natural gas. Just set our Victorian Solar Lamp at your desired location, and let the sun do the rest. The solar lights internal Lithium Ion battery pack charges when sunlight hits the integrated solar panel. At dusk, our revolutionary outdoor Solar Light Bulb with 11 bright-white LEDs will turn on automatically and shine through the beveled glass panes at a brightness of 150 lumens on a full solar charge.
- **Easy Installation With Three Options**– This product is easily assembled with a few basic hand tools. A wall mount, 3" pole mount, and flat pier base is included in the box giving you the choice to mount it anywhere you desire.
 - **Wall Mount** — Allows the lamp to be mounted to any vertical surface such as a wall, fence, or column.
 - **3" Pole Mount** – Allows the lamp to be mounted to an existing electric or gas pole (after it has been safely disconnected and shut off) that has a 3" diameter which is the industry standard.
 - **Flat Pier Base** – Allows the lamp to be mounted to any flat surface that has a minimum of a 6" diameter.
- **Dusk to Dawn:** This Solar Light fixture is designed for dusk to-dawn-operation after its battery has been fully charged during the day. If the panel isn't getting enough direct sun to charge the battery to capacity, switch LED-brightness mode to economy mode to extend nightly light duration. In either mode, Gama Sonic's patented cone reflector enhances the glow and multidirectional light dispersal.
- **Durable and Weather Resistant:** Beyond providing a superior combination of light brightness and duration, Gama Sonic solar light fixtures are known for their physical durability. The monocrystalline solar panel is protected by weather-resistant, cleanable tempered glass that helps ensure long-lasting reliability.
- **Built to Last:** At Gama Sonic, our goal is to build the world's best solar lights by providing long lasting light fixtures that are simply built to last! Every light fixture has an integrated Lithium Ion battery pack that is good for about 1,000 charges. Once the battery exceeds its life – all you will need to do is simply replace the battery and you are good to go for the next 3 years.
- **Do not locate the light fixture in a shaded area:** Recharging speed will vary based on weather conditions, but no charging will occur if direct sun does not shine on the solar panel.

- **WARNING:** GAMA SONIC® Light bulbs are not to be used in other electrical sockets. These are low-voltage light bulbs that are built and designed for our products only! Please note that we highly recommend reading the instruction manual carefully to obtain the best results from your purchase.

Full Technical Specs

Model #	GS-94B-FPW
LED Color	2700K
Technology	Solar LED Light Bulb
Lumens	150
# of LEDs	11
Battery	Li-ion
Voltage	3.2
Battery Capacity	3000 mAh
Power Source	Mono-Crystalline Solar Cell
Light Duration	Up to 12 hours
Measurements	
F	9 x 9 x 15 in
P	9 x 9 x 18 in
W	9 x 11 x 18 in
Weight	7 lbs
Shipping Dimensions	19 x 12 x 10 in
Color	Black
