

## Product Description

The Gama Sonic Weston solar outdoor light fixture model GS-53FPW-PIR is the perfect energy-saving and money-saving replacement for electric or gas-powered outdoor lighting.

This rust-resistant cast-aluminum solar lantern with a sleek, timeless design and a powder-coated black finish makes a stylish addition to your home's exterior. It includes all the hardware for mounting as an outdoor wall sconce; on flat surfaces, such as pillars or columns; or at the top of a three-inch-diameter lamp post. No electrical wiring is required. The Weston's internal Lithium Ion battery pack charges when sunlight hits any of the four integrated solar panels.

At dusk, nine bright-white LEDs will turn on automatically and shine at a brightness of 75 lumens for up to eight hours on a full solar charge. When motion is detected up to 15 feet away from the fixture, light output doubles in brightness to 150 lumens for 45 seconds. Gama Sonic's patented cone reflector enhances the glow.

The Weston's monocrystalline silicon solar panels are protected by weather-resistant, cleanable tempered glass that helps ensure long-lasting reliability. The light's replaceable, plugged battery pack is good for about 1,000 charges. Recharging speed varies based on weather conditions, but generally it takes about six hours of sunlight on the solar panels to achieve a full solar charge of the battery pack after it's been completely run down.

For any unexpected issues, Gama Sonic support at our Atlanta headquarters is here to help.

## Weston Solar Light plus Motion Sensor – Full Technical Specs

Model #	GS-53FPW-PIR
LED Color	6000k
Lumens	75
# of LEDs	9
Battery	Li-ion
Voltage	3.2V
Battery Capacity	1500mAh
Power Source	Mono-Crystalline Solar Cell
Light Duration	
Measurements	
<b>F</b>	7 x 10.5 x 18.5 in
<b>P</b>	7x 6 x 6 in
<b>W</b>	7 x 5 x 8 in
<b>Weight</b>	9 lbs
<b>Shipping Dimensions</b>	24 x 14 x 14 in
