Lutron energy-saving products

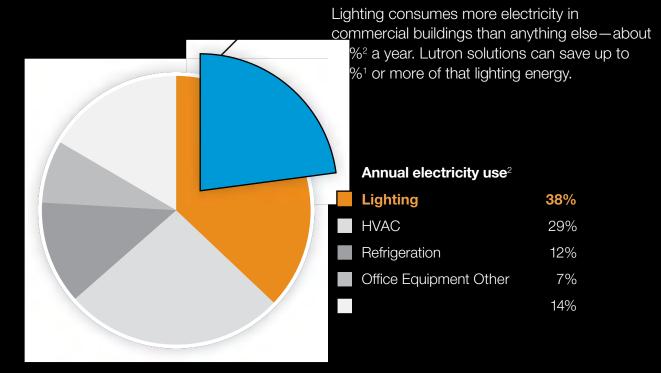

Quick Install Energy Solutions Featuring Energi TriPak.

Energi TriPak®

Energi TriPak is a family of wireless energy-saving products featuring Radio Powr Savr[™] sensors, Pico[®] controls and PowPak[®]/Maestro Wireless[®] load controllers. These components, when combined:

- save up to 60%¹ of lighting electricity usage
- increase occupant comfort and productivity
- control virtually all loads
- reduce installation and programming costs

Lighting typically accounts for 38%² of electricity usage in new construction and retrofit commercial applications, which include spaces such as classrooms and offices. These applications benefit from Energi TriPak energy savings through strategies like automatic occupancy/vacancy sensing and daylight harvesting.

Studies show that proper lighting is beneficial to space occupants. By providing task-appropriate lighting and individual lighting control, Energi TriPak improves comfort and occupant satisfaction, resulting in increased productivity.³

Energi TriPak requires no additional wiring. The components communicate wirelessly via Lutron's reliable Clear Connect_® Radio Frequency (RF) technology. In addition, simple button press programming eliminates the need for factory commissioning.

What is Energi TriPak?

Energi TriPak consists of transmitting devices that send out RF commands to the load controllers. The load controllers receive the RF command and perform the appropriate action based on the information received.

Transmitting devices

Load controllers

2 Lutron

Benefits

- · All points of control are wireless for simple installation with no new wiring
- Simple button programming for all devices

Saves energy and money

Simply incorporate the following energy-saving control strategies:

- Personal dimming control
- Occupancy/vacancy sensing
- Daylight harvesting
- High-end trim
- Plug load control
- HVAC integration

Cost-effective

- No commissioning required
- Overall labor costs reduced due to wireless communication-no additional wiring

Meets codes and standards

Provides the opportunity to meet the following codes and standards:

- LEED NC 2009
- ASHRAE Energy Code 90.1-2010
- · IECC (International Energy Conservation Code)
- ASHRAE Green Standard 189.1-2011
- IgCC (International Green Construction Code)
- CEC Title 24 (California Energy Commission)

Energy-saving control strategies

Personal dimming control

Gives occupants the ability to set the light levels.

Potential lighting energy savings:

10-20%

Occupancy/vacancy sensing

Turns lights on when occupants are in a space and dims lights to a low level or turns lights off when they vacate the space.

Potential lighting energy savings:

Daylight harvesting

Dims electric light when daylight is available to light the space.

Potential lighting energy savings:

High-end trim

Sets the maximum light level based on customer requirements in each space.

Potential lighting energy savings:

10-30%

 (\mathbf{O}) Appliance On Appliance Off

Plug load control

Automatically turns off loads after occupants leave a space.

HVAC integration

Controls heating, ventilation, and air conditioning systems through contact closure.

Potential controlled 15-50%

Potential HVAC savings:

Energi TriPak® application: Public restroom

In public spaces, such as bathrooms, lighting is often on even when the space is unoccupied. Automatic lighting control with occupancy sensing is an ideal energysaving lighting solution.

Energy-saving strategies

Occupancy sensing

Potential lighting energy savings:

50%

Radio Powr Savr ceiling-mount occupancy/vacancy sensor communicates with

load controllers to turn lights on or off

Lutron Clear Connect Wireless Signal Received

PowPak[®] relay module with Softswitch[®] switches loads in response to wireless sensors and controls (mounted in ceiling)

Energi TriPaka application: Private office

Providing personal lighting control in a private office application helps improve occupant comfort.

Energy-saving strategies

Occupancy/vacancy sensing Daylight harvesting Plug load control

Potential lighting energy savings:

45%

Radio Powr SavrTM daylight sensor communicates with load controllers to turn lights on or off based on amount of daylight available

Lutron Clear Connect Wireless Signal Received

PowPak® plug-in appliance module turns phantom loads on or off in response to wireless sensors and controls (located under desk)

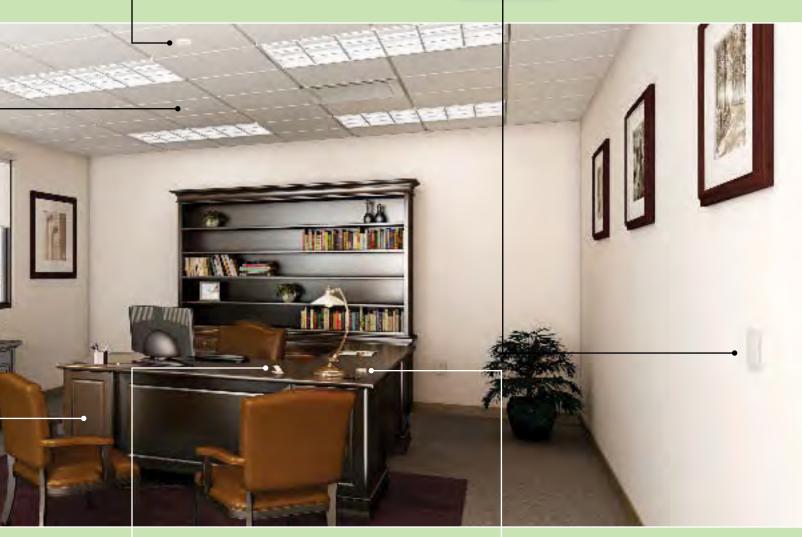

Radio Powr Savr ceiling-mount occupancy/vacancy sensor communicates with load controllers to turn lights on or off

based on occupancy

Maestro Wireless⊚ switch

provides manual control and switches lighting loads in response to wireless sensors and controls

Pico® wireless control allows manual control of loads; place on desk top or mount to wall

Maestro Wireless tabletop lamp dimmer

provides manual control and dims table lamps in response to wireless sensors and controls

Energi TriPak_® application: Classroom

A best-practice classroom combines energy efficiency with a high-quality learning environment. Classroom lighting plays a particularly critical role because of the direct relationship between good lighting and student performance.¹⁰

Energy-saving strategies

Radio Powr Savr wireless daylight sensor

Radio Powr Savr wireless daylight sensor dimensions

- W: 1.60" (41 mm) H: 1.60" (41 mm)
- D: 0.7" (17 mm)

Features

- Utilizes Lutron reliable Clear Connect RF technology to communicate wirelessly with wireless load controllers (wallbox controls, remote-mount modules, and/or plug-in devices); a load controller can communicate with only one daylight sensor
- RF range: 60 ft (18 m) line of sight, or 30 ft (9 m) through walls
- Features Lutron reliable proportional daylight open loop control
- Has a light range 0-107,000 Lux (0-10,000 fc) and a photopic response that matches the human eye
- Designed to give a linear response to changes in viewed light level
- 1 sensor is capable of switching and continuous dimming of multiple zones
- 10-year battery life

Benefits

- Simple calibration
- Multiple ceiling-mount methods available for different ceiling materials
- Front accessible test buttons make set up easy

Models

LRF2-DCRB-WH-daylight sensor

Energi TriPak_® components

PowPak_® relay module

Design statement: The PowPak relay module is designed for spaces where local control is not currently

PowPak relay module dimensions W: 2.89" (48 mm) H: 3.44" (87 mm) D: 1.25" (32 mm)

Features

- General purpose switch (all lighting loads; motor loads; receptacles)
- Receives input from up to 9 Pico® wireless controls, 6 Radio Powr Savr™ occupancy/vacancy sensors, and 1 Radio Powr Savr daylight sensor via Lutron reliable Clear Connect® RF technology Model available with a dry contact closure output for integration with third-party equipment; contact closure output provides occupancy status

16 A model features patented Softswitch_® technology that extends relay life to 1,000,000 cycles

• 120/277 V~ input

Benefits

- Save energy with the addition of occupancy sensing, daylight harvesting and personal control without the need for additional wires
- · Button press programming to associate the module with the

Radio Powr Savr sensors and Pico wireless controls

Mounting

 Mounts through a 1/2" NPT trade-size knock-out to a junction box or to a fixture. Can also be mounted inside of a standard 4" x 4" junction box

Models

RMJ-5R-DV-B—5A lighting loads (1/6HP @ 120V~ or 1/3HP @ 277V~ motor loads)

RMJ-5RCCO1-DV-B-5A lighting loads (1/6 HP @ 120V~ or 1/3 HP @ 277 V~ motor loads) with (1) contact closure output RMJ-16R-DV-B-16A lighting loads (1/2 HP @ 120 V~ or 1 1/2 HP @ 277 V~ motor loads, 15A 120 V receptacles) RMJ-16RCCO1-DV-B-16A lighting loads (1/2 HP @ 120 V~ or 1 1/2 HP @ 277 V~ motor loads, 15A 120 V~ receptacles) with (1) contact closure output

Lutron_® Clear Connect_® Wireless Signal **Received**

PowPak dimming module with EcoSystem_®

Design statement: Specify the PowPak dimming module with EcoSystem for the application that require

PowPak dimming module with EcoSystem dimensions W: 2.89" (48 mm) H: 3.44" (87 mm) D: 1.25" (32 mm)

Features

- Controls up to 32 EcoSystem, EcoSystem H-Series or Hi-lume_® 3D ballasts, or Hi-lume A-Series LED drivers*
- Receives input from up to 9 Pico wireless controls, 6 Radio Powr Savr occupancy/vacancy sensors, and 1 Radio Powr Savr daylight sensor via Lutron reliable Clear Connect RF technology
- Lutron EcoSystem technology facilitates individual ballast addressing, connection of multiple control devices, and control of ballasts individually or in groups
- 120/277 V∼ input

Benefits

- Enables simple reconfiguration of the space, without having to move a single wire
- Dimming saves money and energy—for every percentage reduction in lighting level, there is nearly equal reduction in the energy usage of the dimmed light source
- Additional savings can be achieved through occupancy sensing, daylight harvesting, high-end trim and personal dimming control without the need for additional wires
- Button-press programming means no commissioning required

Mounting

 Mounts through a 1/2" NPT trade-size knock-out to a junction box or to a fixture. Can also be mounted inside of a standard

4" x 4" junction box

Models

RMJ-EC032-DV-B—controls up to 32 EcoSystem, EcoSystem H-Series or Hi-lume 3D ballasts, or Hi-lume A-Series LED drivers

 For more information on EcoSystem, EcoSystem H-Series and Hi-lume 3D ballasts, and Hi-lume A-Series LED drivers, please visit www.lutron.com. Dimming ballasts require rapid start sockets. For more information, see Lutron App Note #122.

Lamp Socket Wiring Tester available to easily troubleshoot ballast wiring issues; Lutron © Clear Connect ® icing.

Stairwell fixture with PowPak® stairwell controller

Design statement: The stairwell fixture with PowPak stairwell controller saves energy by reducing light

Stairwell standard fixture dimensions W: 51.13" (1299 mm)*

H: 4.375" (111 mm) D: 3.875" (98 mm)

NEW Stairwell LED fixture dimensions

W: 28.25" (718 mm) H: 4.75" (121 mm) D: 4.00" (102 mm)

Features

- Incorporates a Lutron digital dimming ballast or LED driver and wireless lighting control (PowPak stairwell controller) programmed to occupied and unoccupied light levels specific to the project
- Occupied and unoccupied light levels are field adjustable
- Utilizes Lutron reliable Clear Connect_® RF technology to communicate wirelessly with up to 9 Radio Powr Savr™ occupancy/ vacancy sensors
- Available in 2, 3, or 4 ft**, 1 or 2 lamp, and T8, T8 reduced wattage, T5HE, or T5HO fluorescent lamp options; and 2 ft, 1500 (17 W) or 2200 (29 W) lumens LED options
- Universal input voltage 120/277 V \sim
- · Ceiling or wall surface mount

Benefits

- Sensor is not integral to the fixture, providing the flexibility to group multiple fixtures to a single occupancy/vacancy sensor and/or multiple occupancy/vacancy sensors to a single fixture
- Easy to install, wireless communication between devices means no additional wiring required

Lutron Clear Connect Wireless Signal Received

Maestro Wireless_® tabletop lamp dimmer and PowPak plug-in dimming module

Design statement: Both the tabletop lamp dimmer and the plug-in dimming module provide control of task lighting and the ability for remote control. Use the tabletop dimmer to provide personal lamp control.

Maestro Wireless tabletop lamp dimmer dimensions W: 2.44" (62 mm) H: 3.25" (83 mm) D: 0.94" (24 mm)

PowPak plug-in dimming module dimensions W: 2.3" (58 mm) H: 3.3" (84 mm) D: 1.2" (30 mm)

Features

- Digital dimmer for use with incandescent/halogen table and floor lamps up to 300 W
- Configure dimming module to switch non-dimmable lighting loads
- Light levels can be fine-tuned to the desired light level
- Incorporates advanced features such as fade on/fade off, long fade off, and rapid full on
- Utilizes Lutron reliable Clear Connect RF technology to communicate wirelessly with up to 9 transmitting devices (Radio Powr Savr sensors and/or Pico® wireless controls)
- · Controls always operate locally, do not require system control
- Available in white or black
- Dimming module available in 1- or 3-receptacle models Benefits
- Easy to install, requires no wires or tools
- Easily incorporate task lighting into lighting solution, while saving energy through dimming
- Button-press programming to associate the plug-in dimmer with the same Radio Powr Savr sensors and Pico wireless controls that control the overhead lighting

Models

PowPak_® plug-in appliance module

Design statement: Specify a PowPak plug-in appliance module to directly control plug loads,

PowPak plug-in appliance module dimensions W: 2.3" (58 mm)

H: 3.3" (84 mm) D: 1.2" (30 mm)

Features

- Utilizes Lutron reliable Clear Connect_® RF technology to communicate wirelessly with up to 9 transmitting devices (Radio Powr Savr™ occupancy/vacancy sensors and/or Pico_® wireless controls)
- Control up to 15A of general purpose load (1/2 HP motor load); no minimum load required
- Patented Softswitch_® technology extends relay life to 1,000,000 cycles
- · Can be hidden discretely behind furniture
- · Controls always operate locally, do not require system control
- · Available in white or black, and 1- or 3-receptacle models

Benefits

- Save energy by switching off plug loads when space is unoccupied
- Button-press programming to associate the plug-in appliance module with the same Radio Powr Savr occupancy/vacancy sensors and Pico wireless controls that control the overhead lighting

Models

MRF2-15APS-1-XX-15A plug-in appliance module, 1-receptacle, 120V \sim

MRF2-15APS-3-XX—15A plug-in appliance module,

3-receptacle, 120V~

(XX in the model number represents color/finish code; please visit www.lutron.com for color choices.)

PowPak relay module with Softswitch

Design statement: Specify a PowPak relay module with Softswitch to switch receptacles, controlling plug loads which consume energy when space is not in use.

PowPak relay module with Softswitch dimensions W: 2.89" (48 mm) H: 3.44" (87 mm) D: 1.25" (32 mm)

Features

- 16A general purpose switch for control of 15A 120V \sim receptacles
- Receives input from up to 9 Pico wireless controls, 6 Radio Powr Savr occupancy/vacancy sensors, and 1 Radio Powr Savr daylight sensor via Lutron reliable Clear Connect RF technology
- Model available with a dry contact closure output for integration with third-party equipment; contact closure output provides occupancy status
- Patented Softswitch technology extends relay life to 1,000,000 cycles
- 120/277 V~ input

Benefits

- Save energy by switching off power to plug loads when space is unoccupied
- Button press programming to associate the module with the

Radio Powr Savr sensors and Pico wireless controls Mounting

 Mounts through a 1/2" NPT trade-size knock-out to a junction box or to a fixture. Can also be mounted inside of a standard 4" x 4" junction box

Models

## Pico wireless control dimensions

- W: 1.28" (33mm)
- H: 2.60" (66 mm)
- D: 0.33" (8 mm)

## Features

- Utilizes Lutron reliable Clear Connect RF technology to communicate wirelessly with wireless load controllers (wallbox controls, remote-mount modules, and/or plug-in devices)
- RF range: 30 ft (9 m) through wall
- Available in multiple button configurations with options for preset and raise/lower buttons
- 10-year battery life

## Benefits

- · Easily add a new and/or additional point of control without the need for new wires
- Easy configuration for use as a handheld control, car visor control, wall-mount control, or tabletop control with use of the optional pedestal

# Stairwell Retrofit Solution

The stairwell fixture with PowPak<sub>®</sub> stairwell controller communicates wirelessly with Radio Powr Savr™ occupancy/vacancy sensors. Based on the stairwell occupancy information received from the sensors, the PowPak stairwell controller automatically adjusts the light output. The occupied and unoccupied light levels are field adjustable to meet the project's code requirements.

## Unoccupied: 10% light level

## Variable Air Volume (VAV) integration

In response to information received from a Radio Powr Savrm occupancy/vacancy sensor, the PowPak® contact closure output module communicates room occupancy to the VAV terminal unit. By not heating or cooling an unoccupied room, the electricity consumed by the HVAC system can be reduced.

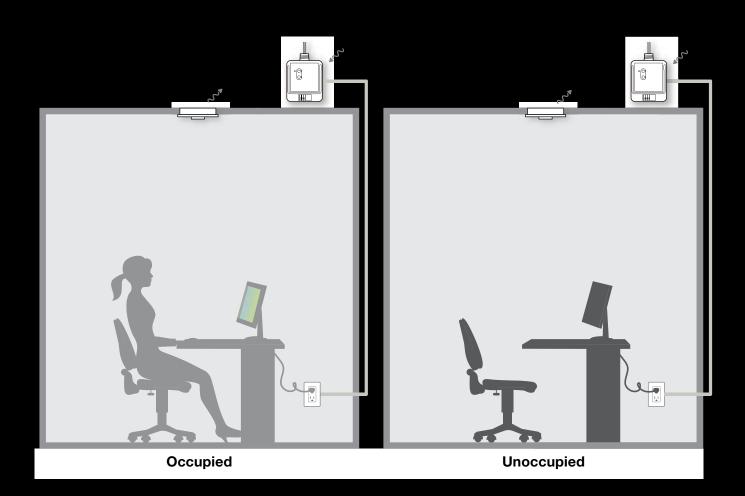

# Plug load control by switching receptacles

Plug loads, such as task lighting, computer monitors, and printers, account for greater than 5% of commercial electricity usage<sup>2</sup>. By utilizing the PowPak relay module with Softswitch<sub>®</sub> and a Radio Powr Savr occupancy/vacancy sensor to switch receptacles, energy savings can be obtained. The occupancy/vacancy sensor communicates room occupancy wirelessly to the relay module. Based on the occupancy status received, the relay module switches the power to the receptacles on or off, reducing the amount of energy consumed.

## Maestro<sub>®</sub> occupancy sensing controls\*

**Design statement:** Maestro occupancy sensing switches and dimmers are alternate energy-saving solutions for smaller spaces with unobstructed views.

Maestro occupancy sensing switch dimensions W: 2.83" (75 m) H: 4.61" (119 m) D: 1.125" (30 mm)

**NEW Maestro dual circuit** occupancy sensing switch dimensions

W: 2.83" (75 m) H: 4.61" (119 m) D: 1.125" (30 mm)

## Features

- Lutron XCT<sup>™</sup> signal processing technology greatly enhances the performance of PIR sensors, enabling them to detect minor motions that other sensors could not previously detect
- 180° sensor field-of-view, must have unobstructed view
- Up to 30ft x 30ft major motion coverage and 20ft x 20ft minor motion coverage
- Adjustable timeout 1, 5, 15, or 30 minutes
- High-low sensitivity adjustment
- Vacancy/partial-on models available to meet CA Title 24 requirements
- Switch models feature ambient light detection, and are available in single or dual circuit
- Available in 27 colors to complement any décor

#### **Benefits**

- Save energy automatically with the simple addition of occupancy/vacancy sensing
- Dual circuit sensor provides bi-level control of two circuits, as required by specific energy codes
- Easy to install, directly replaces an existing control with no new wiring required

\* Vacancy/partial-on models available to meet California Title 24 section 119(j) requirements.

\*\* Available in white only.

<sup>+</sup> Price indicated for light or power text/icon labeling only.

<sup>+†</sup> Price indicated for Arctic White and Midnight only, contact Lutron for additional color options and pricing. <sup>‡</sup>

Price indicated for gloss finish only.

## Sources

- 1 Compared with manual (non-automated) controls, up to 60% lighting energy savings is possible on projects that utilize all of the lighting control strategies (occupancy sensing, high-end trim, personal control and daylight harvesting). Actual energy savings may vary, depending on prior occupant usage, among other factors.
