

LED RETROFIT CAN

The LED Retrofit Cans are replacements for existing, less efficient incandescent and compact fluorescent (CFL) light sources. They consume up to 80% less energy, thereby significantly reducing operating costs. The superior life hours of this lamp make it ideal for hard to reach places, reducing maintenance.

ECO-FRIENDLY, MERCURY FREE • NO UV • NO PROJECTED HEAT

**Dimmable
LED**

By incorporating advanced circuitry into our LED products, dimmable LED lamps function with switch dimmers just as normal incandescents do by allowing full linear dimming control.

NOTE: Due to multiple input voltage integrated circuits, some items may not be compatible with dimming devices. These items may not be compatible with all electronic transformers.
