1 Savings based on replacing a switch with a Lutron C•L dimmer and replacing your incandescent bulbs with dimmable CFLs. Actual savings may vary depending on use and application. A high percentage of the savings derive from switching from the incandescent to the CFL. Typical residential savings are estimated to be \$22 per year. Stated savings of \$50 based on replacing (5) 65 W incandescent reflector lamps (rated at 1,500 hours each, costing \$1.75 per lamp or (5) 3,000 hour halogen bulbs costing \$3.35 per lamp) with (5) 16 W CFL reflector lamps (rated at 8,000 hours each, costing \$11.49 per lamp) and dimming for 5 hrs per day with electricity cost of \$0.1176/kWh. \$50 savings further assumes lamps are dimmed to 50% perceived light level, corresponding to 40% reduction in power level.

Dimmers for CFL•LED Dimmable Bulbs

Now you can increase your energy savings using dimmable CFL and LED bulbs — with Lutron's new line of dimmers.

Works with:

Dimmable CFLs

Dimmable LEDs

Halogen and Incandescent bulbs

◀ Diva®/C•L Dimmer in White

Dimmers for CFL•LED Dimmable Bulbs

- FAQs
- Detailed product information
- Complete list of approved bulbs

What is a C•L Dimmer?

C•L dimmers are UL listed for controlling a broad range of dimmable CFLs and LEDs. They offer more reliable dimming performance over standard dimmers when dimming CFLs and LEDs, and also provide full range dimming for incandescent and halogen bulbs.

Benefits

- Enjoy the energy savings achieved from dimmable CFL and LED bulbs without sacrificing the ability to dim
- Dimming saves additional energy while creating just the right light for any mood or activity—**Save up to \$50 per year¹** when combined with dimmable CFLs.
- Avoid experiencing common issues found when controlling dimmable CFLs and LEDs with a standard dimmer
 - Lamps turning off before the slider on the dimmer reaches the lowest setting (drop out)
 - Lamps not turning on after being dimmed to the lowest setting (pop on)
 - Lamps turning off when dimmed to low levels caused by voltage fluctuations
- The forward-thinking engineering ensures control of dimmable CFL and LED bulbs today as well as energy efficient light sources coming out in the future—invest in a dimmer that ensures dimming performance as the light source industry evolves

Typical Applications

- Kitchen
- Bathroom
- Bedroom
- Dining Room
- Conference Room

Features

HED™ Technology

- Features advanced dimming circuitry designed for compatibility with most high-efficacy light bulbs
- Works with dimmable CFLs, dimmable LEDs, halogen and incandescent bulbs
- One dimmer allows you to dim a broad range of light sources—mix and match light source types on one circuit

Please refer to the "How to calculate wattage when mixing lamp types" table, on www.lutron.com/dimcflled, when using a combination of bulb types with the C•L dimmer.

Adjustment Dial*

- Adjustable low-end trim allows dimmer to accommodate a broad range of dimmable bulbs
- Because performance is so varied from bulb to bulb or manufacturer to manufacturer, the adjustment dial will help you set the bottom of the dimming range for your particular bulbs.

* Adjustment dial not available on the Credenza® /C•L model

Please refer to the instruction sheet, which can be found at www.lutron.com/dimcflled for more information.

Approved Bulbs

- UL listed to work with an extensive list of dimmable CFL and LED bulbs from a variety of manufacturers:
 - Cree®
 - GE®
 - Philips®
 - EcoSmart™
 - Halo®
 - Sylvania®
 - Feit
 - Lighting Science®
 - TCP
