

Paraclipse® FLY PATROL™

Insect Control that's as attractive to your eyes as it

For inconspicuous fly control in public areas, our decorative systems are powerful units that work hard and look great:

1. Proprietary Top Shell Design
Directs UV Light Downward for Maximum Fly Catch
2. Quantum UV Lamp
3. Capture Cartridge
4. Audible Cartridge Replacement Alarm

The Fly Patrol is a remarkably versatile decorative fly control system. Beautifully designed, it is powerful enough for commercial use in areas up to 1,000 square feet. The unique design allows the Fly Patrol unit to be wall mounted or placed on a flat surface. Like all Paraclipse units, it uses special UV light, attractants and decoys on the trapping surface to lure and capture flies. It's small size blends into any décor, and features a 30-day auto-advance cartridge. In bars and other areas where fruit is cut and stored, the Fly Patrol is also effective in controlling gnats and fruit flies.

- Kitchens
