

# INSTALLATION INSTRUCTIONS FOR THE 4FT, 8FT - X1 SERIES

**APPLICATION:** General/Perimeter Lighting

1- Install red sockets to one end of the fixture.

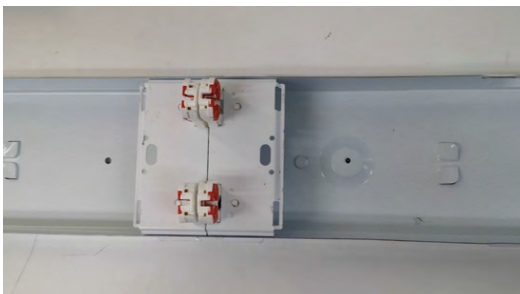

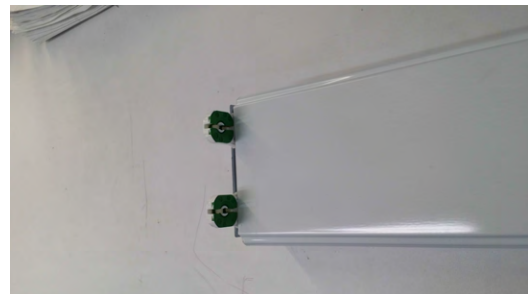

2- Install green sockets to the opposite end of the fixture.

3- Remove the knock-out in desired location. Bring the quick disconnect thru.

4- Install the cover to the pan.

5- With the power still disconnected, install the LED lamps to the fixture. Then test the fixture.

6- For 8FT fixture, install red sockets back to back in the center of the fixture as shown. Install green sockets at the ends of the fixture.

7- Install end caps by pressing straight in to the ends of the fixture.
