

200 SERIES

Specification Grade Wraparound

The 200 Series combines the desirable characteristics of the traditional wraparound with an extremely low silhouette to provide a specification luminaire for the conservative budget. Engineered to provide comfortable brightness values in the direct glare zone, the 200 Series is available in two, four and eight foot lengths and is an ideal series for schools, stores and offices. The X1LED specification grade Wraparound fixtures utilize efficient LED T8 lamps that provide high lumen output with efficient energy savings. Since they don't require any ballast or driver the only component that will ever need changing is the LED T8 lamp. The lamps are warranted for five years. Unlike specification grade Wraparound fixtures that utilize LED arrays and drivers these fixtures have the flexibility to change wattage, lumens, and color temperature simply by changing the lamps without the need to call a licensed electrician.

LAMP

2 or 4 lamp positions

CONSTRUCTION

Body and ends are die blanked, pierced and formed of 20 gauge cold rolled prime steel for rigidity and uniformity. Forming of the housing has been engineered to provide added strength along its entire length. Socket bars and wireway covers snap in place for easy installation and maintenance.

MOUNTING

Surface or suspended, not for wall mount

DIFFUSERS

A crystal clear diffuser extruded from 100% virgin acrylic that will maintain its color under normal conditions, indefinitely. Linear prisms on the interior side walls direct the light ceilingwards, which can then refract back down, The bottom is composed of an evenly spaced pattern of conical prisms yielding low brightness, glarefree diffused light. Diffuser is lift and shift for ease of relamping and cleaning and is capable of hanging down from either side of the housing.
