

# PLT & 4RB SERIES

## 48" Ballast Cover Retrofit Kit

This PLT retrofit kit is ideal replacement for any 4.25 or 5 inch two light strip to save 40% of energy. Kit includes new ballast cover, unshunted sockets and LED T8 lamps to provide a long life and easily changeable T8 LED lamps. Ballast retrofit kit, 48 in. long, converts an existing strip to carry standard lamps. Material is die-formed 22 gauge steel, with high reflectance baked white enamel finish. TEK screws are provided to attach retrofit ballast cover to an existing channel. The PLT retrofit kit utilize efficient LED T8 lamps that provide high lumen output with efficient energy savings. Since they don't require any ballast or driver the only component that will ever need changing is the LED T8 lamp. The lamps are warranted for five years. Unlike retrofit kits that utilize LED arrays and drivers these fixtures have the flexibility to change wattage, lumens, and color temperature simply by changing the lamps without the need to call a licensed electrician.

### KIT INCLUDES

- (1) 48 in. Ballast cover with lamp holder cut outs
- (1) Ballast mounting plate
- Short Lamp Holders (style & quantity as specified)
- (8) #8 x 3/8" TEX mounting screws
