Light Bulb
replaces 60w
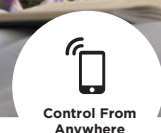

**WINK APP COMPATIBLE · WINK HUB REQUIRED**

CREE

Easily control light from anywhere.

The Connected Cree® LED bulb combines the great features of our next-generation Cree 4Flow™ Filament design with easy-to-use technology to make it simple for you to control your lighting from anywhere.

Simply install your bulbs and compatible hub, sync with the applicable app, and begin to control your light settings using your iOS® or Android® device.

Control From Anywhere

Color Rendering Index	>80	>80
Rated Life (Hours)	25,000	25,000
Color Temperature (K)	2,700	5,000
Beam Spread	Omni-directional	Omni-directional

CONNECTED

Smart lighting never looked so good.

The Connected Cree LED bulb provides an omnidirectional all-around light source unmatched by any other connected LED bulb. This means that when you turn it on it looks like, and illuminates like an incandescent.

What makes them great?

- Easily control individual lights or groups of lights from anywhere
- Dim or brighten to just the right setting from the palm of your hand
- Conveniently schedule lights to turn on and off automatically
- Multi-system compatible bulbs work with: Wink, SmartThings, WeMo, and Zigbee® certified hub
- Save money now and save money later—uses up to 85% less energy than an incandescent
- 25,000-hour lifetime compared to about 1,000 hours for typical incandescent

The Connected Cree LED Bulb

Control light from anywhere

CREE

The Connected Cree LED bulb works with ZigBee® certified hubs and requires the compatible iOS® or Android® smartphone app.
