Contact manufacturer with any questions or concerns regarding installation of this luminaire.

Adjustable Slip Fitter-Suitable for max. tenon size 1 3/8"

Round Pole Mount-Suitable for 4" to 6" pole and Straight Pole Mount-Suitable for 3" x3" or larger pole

Trunion Installation

The diagram for Trunion Installation includes three parts: a perspective view of the fixture showing the trunion mechanism, a circular inset labeled 'Picture C' showing a close-up of the mounting hardware with labels for 'M8' (trunion bolts) and 'M5' (positioning screws), and a 'Bolt Hole Pattern' diagram showing the dimensions of the mounting holes: 19mm for the top hole, 50mm for the bottom hole, and 88mm for the overall width.

Step 1: Mount the fixture to suitable flat surface with adequate hardware for that surface;

Step 2: Hold top of fixture, loosen (2) M8 Trunion Bolts and (2) M5 Positioning Screws;

Step 3: Adjust the U Trunion to suitable position;

Step 4: Swivel the fixture until Positioning Screws are in one of the Positioning Holes;

Step 5: Tighten the (2) M8 Trunion Bolts and (2) M5 Positioning Screws (see picture C).

York Bracket Installation

The diagram for York Bracket Installation shows a perspective view of the fixture with the York bracket attached. Labels indicate 'M5' screws for the bracket and 'M12' screws for the fixture.

Step 1: Loosen the (2)M12 and (4)M5 screws;

Step 2: Adjust the fixture to required angle, and tighten (2) M5 positioning screws on one side;

Step 3: Tighten the (2) M12 and the (2) M5 screws on the other side;

Step 4: Connect the L/N/GND wires.

(provided shorting cap)

Remarks:

PLT AREA LIGHT UNITS come with receptacles installed on the fixture, end-users can either twist in a 3pin photocell, or the provided shorting cap.
