

WARNINGS AND CAUTIONS:

- **TO AVOID FIRE, SHOCK, OR DEATH; TURN OFF POWER AT CIRCUIT BREAKER OR FUSE AND TEST THAT POWER IS OFF BEFORE WIRING!**
- To be installed and/or used in accordance with appropriate electrical codes and regulations.
- If you are unsure about any part of these instructions, consult an electrician.
- To avoid overheating and possible damage to this device and other equipment, do not install to control a receptacle, fluorescent lighting, a motor- or a transformer-operated appliance.

WARNINGS AND CAUTIONS:

- Use with compatible dimmable LED, CFL bulbs, incandescent or 120V halogen fixtures only. For a complete list of compatible LED and CFL bulbs refer to www.leviton.com.
- When multiple bulbs are used with one dimmer DO NOT mix bulb types. All bulbs shall be either LED; CFL or incandescent. Using the same make/model of each bulb will enhance dimmer performance.
- **Use this device with copper or copper clad wire only.**

Tools needed to install your Dimmer

- Slotted/Philips Screwdriver Electrical Tape Pliers
 Pencil Cutters Ruler

Installing Dimmer by itself or with other devices

If installing Dimmer in a single device application, proceed with the **INSTALLING YOUR DIMMER** section. If installing Dimmer in a multi-device application, proceed as follows:

MULTI-DEVICE APPLICATION:

In incandescent multi-dimmer installations, the reduction of the dimmer's capacity is required. Refer to the chart for maximum load per dimmer. No derating is required for use in Dimmable CFL or dimmable LED multi-dimmer installations.

MAXIMUM LOAD PER DIMMER FOR MULTI-DEVICE			
Cat. No.	Single	Two Devices	More than 2 Devices
6672	600W	500W	400W

INSTALLING YOUR DIMMER

NOTE: Use check boxes when steps are completed.

Step 1 **WARNING: TO AVOID FIRE, SHOCK, OR DEATH; TURN OFF POWER** at circuit breaker or fuse and test that power is off before wiring!

Step 2 **Removing existing switch:** Remove existing wallplate and switch mounting screws. Carefully pull switch from wall box. **DO NOT** remove wires attached to the switch at this time.

Step 3 **Identifying your wiring application (most common):**

NOTE: If the wiring in the wall box does not resemble any of these configurations, consult an electrician.

Single-Pole:
 Look at the back of your switch. If there are 2 wires connected to two screw terminals (not including a green or bare copper wire used for grounding), you have a Single-Pole switch.

Step 4 **Disconnecting switch wires and preparing wires:**

- Disconnect wires from screw terminals or Quickwire™ slots (shown).
- Pull off pre-cut insulation from Dimmer leads. Twist strands tightly together.
- Make sure that the ends of the wires from the wall box are **straight (cut if necessary)**.
- Remove 5/8" (1.6 cm) of insulation from each wire in the wall box (shown).

Step 5 **Single-Pole Wiring Application:**

Connect wires per WIRING DIAGRAM as follows:

- Screw wire nuts on clockwise making sure no bare conductors show below the wire connectors. Secure each connector with electrical tape.
- Green dimmer Ground lead to Green or bare copper wire in wall box.
 - Black dimmer lead to any wall box wire removed from old switch.
 - Remaining Black dimmer lead to remaining wall box wire.
 - **Proceed to Step 6.**

Step 6 Testing your Dimmer prior to mounting in wall box:

NOTE: Cat. No. 6672 is shipped with the indicator light disabled (OFF). If you want the light option (ON), with an insulated screwdriver slide the switch at the TOP of the frame to the left while facing the device before mounting wallplate.

- Restore power at circuit breaker or fuse.
- Carefully holding Dimmer as shown proceed as follows: Slide control lever up to highest position. Lights should turn ON to brightest level.

Step 7 Dimmer Mounting: TURN OFF POWER AT CIRCUIT BREAKER OR FUSE.

Installation may now be completed by carefully positioning all wires to provide room in wall box for dimmer. Mount dimmer into box with mounting screws supplied. Attach Decora® wallplate.

Step 8 Restore Power: Restore power at circuit breaker or fuse. Installation is complete.

OPERATION

Optional locator light: The locator light illuminates the switch when the dimmer is the OFF position. To activate, slide the selector switch to the ON position.

NOTE: It is recommended the locator light should not be used when the dimmer is connected to dimmable LED or CFL bulbs. The locator light may flicker when connected to dimmable LED or CFL bulbs.

Cat. No. 6672

- ON:** Slide control lever up to turn lights ON at desired level of light.
- OFF:** Slide control lever all the way down until it clicks to turn lights OFF.
- BRIGHTEN:** Raise slider control lever.
- DIM:** Lower slider control lever.

TROUBLESHOOTING

- **Lights Flickering**
 - Lamp has a bad connection.
 - Wires not secured firmly with wire connectors.
- **CFL and LED flickers at low end of dimming range**
 - Increase the low end of the dimming range.
- **CFL or LED bulb flickers throughout dimming range**
 - Please refer to recommended dimmable LED bulbs and CFL bulbs at www.leviton.com.
- **Light does not turn ON**
 - Circuit breaker or fuse has tripped.
 - Lamp is burned out.
 - Lamp Neutral connection is not wired.

For non-standard wiring applications, refer to Wire Connector and Number of Conductors Chart

WIRE CONNECTOR / # OF COND. COMBINATION CHART

1- #12 w/ 1 to 3 #14, #16 or #18
2- #12 w/ 1 or 2 #16 or #18
1- #14 w/ 1 to 4 #16 or #18
2- #14 w/ 1 to 3 #16 or #18
