### LAMP WATTAGE

(1) CDM50ED17(1) CDM70ED17 (1) CDM100ED17

### DESCRIPTION

Ceramic Metal Halide (CMH) ED17 Reflector. Fixture converts general light from an ED17, and forces the distribution into a 14° narrow flood angle similar to that of a PAR lamp source. Utilizes electronic metal halide ballast designed for use with higher CRI Index ED-17 ceramic metal halide light sources.

### FEATURES

- Electronic ballast
- Multi-Faceted reflector
- Deep drawn one-piece steel socket cup & reflector shroud
- Tempered safety shield
- Heat resistant Teflon coated wire lead
- High-strength stainless steel electrical contacts
- One or two circuit track capable

### HOUSING, SOCKET & REFLECTOR SHROUD

.060 Deep drawn steel construction with softened edges. Conical face completely houses faceted reflector and lamp. L-Bracket provides firm friction hold for accurate aiming.

### REFLECTOR

.050 Multifaceted aluminum reflector. Provides a 14° narrow flood distribution common to PAR light sources to an ED-17 light source. Finish is clear specular with reduced iridescence.

### SHIELD

.11 Tempered glass shield reduces UV radiation and provides protection in case of ED-17 light source failure or shattering.

### BALLAST HOUSING

.06 Baked enamel finished solid steel construction. Access cover secured with four screws. Top surface contains 3-contact track adapter and additional locking tab opposite contact head. Housing is positioned vertically, perpendicular to ceiling/floor.

### BALLAST

Integral .90 high power factor electronic solid state Type-1 ballast housed in .060 finished steel enclosure. Ballast provides automatic termination upon end of lamp life. i.e. "End of Life" as well as thermal shutdown protection.

### WIRING

Teflon coated wire lead connects socket and housing to electrical contact head. Teflon coating is durable and resists heat degradation from lamp and housing radiation.

### CONTACT HEAD ASSEMBLY

Three .030 stainless steel contacts mounted in high heat rated plastic housing.

### ONE/TWO CIRCUIT CONVERSION

Positive contact (opposite neutral and ground contacts) is preset to "down" position at factory, but may be raised to the higher position to install onto the second circuit of Nora Lighting NT-2300 series two-circuit track.

### FINISHES

White or Black heat rated baked enamel paint. Custom painting or anodizing for special applications is also available. Custom finishes will require lead times that

vary depending on vendor schedules. Please consult factory for quotation, and provide either a Dunn Edwards number or color chip for exact matching.

### COMPATIBILITY

Nora track fixtures are interchangeable with Halo, Catalina, Hampton Bay, Halo-Edison, or any other brands configured to Halo track system design. Note: fixtures may not be compatible with non-Nora transformers or monopoint adapters.
