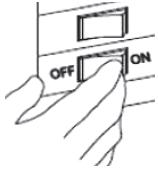
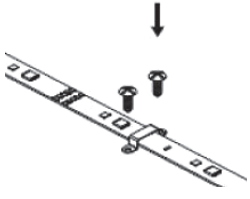
INSTALLATION

Before installation, select a location where you want to install, measure the required length of strip light, and mark it. Confirm that the adapter power cord will reach the desired power outlet and the LED strip light. Clean the mounting surface and keep it dry. It is important that the surface is smooth and clean before mounting the fixture.

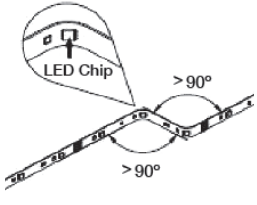
STEP 1: Turn power OFF before installing fixture.



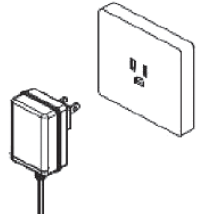
STEP 2: Find the desired place for the strip light and mark it clearly using the provided clips. Mount the fixture using the provided screws.



STEP 3: If there is an LED chip in a corner when placing the strip light, ensure the angle of the bend is greater than 90º to avoid damaging the LED chip.

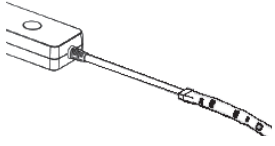


STEP 4: Plug strip light into the nearest outlet. Installation is complete. Turn power ON.



STEP 5: Via the control button on the driver, toggle through the functions:

- Warm White – ON
- Cool White – ON
- Warm and Cool White – ON
- RGB – ON
- OFF
- Press and hold on for 5 seconds to connect APP



STEP 6: App Connection: To connect your device, download the free “Starfish Smart Lighting” App from the app store. Please refer to our Starfish User Guide for detailed instructions on how to pair your device.
