## Writing to a Driver

- 1. Open the Touch to Tune app *\*The passcode to use the touch to tune app will always be 123456.*
- 2. Click on the "Write" button

3. Click on the "Select Driver" dropdown and choose the driver that you want to tune

4. Adjust the Output Current and Dimming Level as needed.

**Universal**<sup>™</sup> Lighting Technologies 5. Scroll down to adjust Dimming Curve, Full Bright Control Voltage, Minimum Dim Control Voltage, and Dim-To-Off-Control Voltage if needed. \* *This step is not required.* 

If Basic Dimming under Programming Options is selected, these fields will not be displayed.
