

EncapSulite®

UltraGuard®

SHATTER RESISTANT LIGHTING

EncapSulite shatter resistant lamps deliver superior protection against accidental lamp breakage. **UltraGuard** Teflon™ shatter resistant lamps are suitable for incidental food contact in federally inspected food, meat and poultry plants. **UltraGuard** is the only coating that can resist powerful UV emissions, high heat of T5HO lamps, long life T8 lamps, and caustic cleaners while not yellowing and breaking apart. A perfect solution for long-life LED T8s, fluorescent lamps, Germicidal and Black Light lamps. EncapSulite shatter resistant coatings are UL recognized for safety and UL-EPH certified for environmental and public health.

FEATURES

- Contains Glass in case of Breakage
- Designed for Long-life Lamps
- Designed for Open or Closed Fixtures
- UL Recognized for Safety
- UL-EPH Certified / NSF Rated
- For Use in Ambient Temps < 400°F
