

52-inch Ceiling Fan

OVERVIEW

Energetic Lighting's ceiling fan is the perfect combination of modern and technology. Solid wood blade options, made from durable walnuts, Avoiding the formaldehyde pollution of industrial synthetic fan blades.

This ceiling fan is designed for light sleepers, Features a 35W DC silent bearing copper core motor. The volume is low to 35dB when the fan is running, like the sound of falling leaves, a reduced 30% volume compared to traditional fans. it is more suitable for families with babies or elders. The reversible function can cool your room in summer and help rotate warm air in winter by pressing the reversible button on the remote control.

Most of the functional components have been assembled. You can save on the expensive cost of hiring an electrician and finish the installation alone within an hour.

KEY FEATURES

- The ceiling fan with three color temperature (Warm white/Natural White/Daylight) options and Dimming, the memory function maintains the previous settings.
- Energetic Lighting's ceiling fan with lights come with your choice of 5" and 10" down-rod sizes, ensuring you get the perfect fit for your ceiling height.
- Suitable for Angled mount, vaulted ceiling angle is not to exceed 15 degrees.
- Ceiling fan with light fixture has obtained ETL certification.
- The motor is guaranteed for 10 years, and the entire product warranty is for 2 years.
