

WARNING

- For use on 120V AC, 60Hz circuits only.
- Do not overload the maximum wattage rating for any socket. The maximum rating for each socket is 25 watts.
- Do not overload the maximum wattage capacity in any run. The maximum rating for this product is 1,440 watts. The light string may need to be cut in order to not exceed the maximum wattage.

CAUTION

- This light string can be connected to additional, compatible light strings. Do not allow the total connect run exceed the maximum rating of 1,440 watts.
- Do not hardwire the light string.

NOTICE

- Periodically inspect the wires and sockets for degradation due to weather, UV light, or any other damage. Promptly replace the light string if any degradation or damage is observed.

Installation Instructions

- Suspend the light string by attaching a suspension cable (not included) to solid support structures, such as joists, beams or wall studs. Proper diameter cabling must be used for the maximum span distance between the supports.
- The light string can be supported from the suspension cable using zip ties or other appropriate support methods (support material not included).
- If a suspension cable is not used, the light string can be properly supported from solid structures using zip ties, eyebolts, or other appropriate support methods (support material not included).
- Install the desired lamps (not included) in the sockets once the light string is properly suspended and supported. The recommended lamps for this light string are Type A, G, S, candelabra base, self-ballasted CFL or self-ballasted LED lamps.

Light String Sets with Polarized Plugs

- The plug-in light string sets are supplied with an attached polarized plug that will only fit into a polarized outlet.
- If the plug does not fit into the outlet, reverse the plug and try again. If the plug still does not fit, contact a qualified electrician. Do not alter the plug.
- If applicable

⚠ WARNING

- Before installing, servicing, or performing routine maintenance upon this equipment, follow these general precautions.
- To reduce the risk of death, personal injury, or property damage from fire, electric shock, falling parts, cuts/abrasions, and other hazards, read all warnings and instructions included with and on the patio string lights box and all fixture labels.
- Power must be turned off at the breaker before installation or maintenance.

- Installation, service, and maintenance of patio string lights should be performed by a qualified licensed electrician.
- Wear gloves and eye protection at all times while installing, servicing, or performing maintenance on the patio string lights, and avoid direct eye exposure to the light source while it is on.
- Do not install damaged product. Inspect patio string lights for damage that may have occurred during transit. If damaged, contact the manufacturer immediately.
- These instructions do not purport to cover all details or variations in equipment nor to provide every possible contingency to meet in connection with installation, operation, or maintenance. Should further information be desired or should particular problems arise which are not covered sufficiently for the purchaser's or owner's purposes, contact the manufacturer.
