

4W LED T14 2100K CURVED FILAMENT SPIRAL

Item #776518

Ordering Code LED4T14/21K/FIL-NOS/CURV/SPIRAL

UPC 739698765181

- Improved curved filaments are thinner than before to provide the most authentic representation of an incandescent filament bulb and generate more light output (higher lumens) than before
- Full glass enclosure to provide the proper shape and size of the incandescent counterpart
- Commonly used in pendants, chandeliers, portables, vanities, and sconces
- Fully compatible with all dimmer types

## TECHNICAL SPECIFICATIONS

\*Maximum Tested (Lamps per Dimmer) - Additional lamps may work with your dimmer system. For maximum capacity please consult dimmer manufacturer.  
 †May experience "pop-on", lights cannot be turned on immediately to their minimum level. The slider needs to be raised above the minimum light level for the lights to first turn on if they were initially off. Then, the slider can be lowered to get to a lower light level; the dimmer cannot be turned on to just the minimum level.

|                                    |  |
|------------------------------------|--|
| <b>Overall Rating</b>              |  |
| <b>Not Compatible</b>              | One or more of the following observed: Major flickering at various points, significant audible noise, no dimming range, does not turn off.   |
| <b>Bad</b>                         | One or more of the following observed: Some flickering observed at various points, audible noise may be present, dimming not smooth.   |
| <b>Good</b>                        | One or more of the following observed: Minor flickering at some point may exist. Dead travel may exist, which means there may be periods of time when the slider (or other form of control button) is moved without affecting the light level. These periods of dead travel are minor and most of the time not visible. Minor audible noise. |
| <b>Best</b>                        | Most of the following observed: No flickering, minimal audible noise (typically less than 25 dBA), wide dimming range - can dim down to 20% or less of light output.   |
| <b>High End (H.E.) Dead Travel</b> |  |
| <b>Low End (L.E.) Dead Travel</b>  | Determines how much, if any, dead travel exists at the top and bottom of the dimmer's range. Dead travel is when the slider can be moved without affecting the light level.  |
